SURVEY METHODOLOGY

Field dates	September through October, 2024
Survey target	Career Service Professionals throughout Canada
Survey methodology	Online survey distributed via email and social media
Question formats	Multiple choice (total to 100%), multiple answer (total may exceed 100%) and open-ended
Survey languages	English and French
Survey sample size	1033 respondents
Lead researchers	Gabriel Hachard and Michael Harker, Community Researchers
Qualitative research analyst	Eniola Osazuwa, Community Researchers

1. Demographics of Career Development Professionals measured

- Three-fifths of respondents age 45 and over; vast majority hold university degrees
- Over half have been working in career development for more than 10 years

2. Use of artificial intelligence emerging in the sector

- Nearly one-quarter using AI tools while one-third are beginning integration
- Respondents shared opinions regarding AI skills, tools and training

3. Respondents plan to stay within the sector in the next five years

- More than half plan to stay with their organizations and one-fifth want to switch organizations
- Only 5% plan to move to a different field within five years

4. Career Development Professionals shared mental health concerns

- One in three reported a decline in their mental health since the pandemic
- Many support their mental health through books, therapy, and peer groups

5. Survey gauged interest and preferences regarding professional development

- Respondents reported interest in learning innovations, trends, practices, and theories
- In-person conferences and asynchronous online courses were preferred learning methods

6. Most respondents have access to budget and time off for training

- Two-thirds have access to training budgets, though most are under \$1,000 annually
- More than half reported access to paid time off for training

7. Respondents shared mixed opinions regarding the public's awareness of the field

- 29% of respondents feel that public opinion of CDPs has improved since 2019
- Half of respondents believe the public has no awareness of Career Development Professionals

8. Career Development Professionals told us about concerns of their clients

- 56% believe client's main concern is their ability to find decent-paying work
- 86% of CDPs feel clients are placing greater importance on remote/hybrid work post-pandemic

n=928

Popular other responses: Not applicable (2%), I wasn't working in this field pre-pandemic (2%) and retired (1%).

Respondent Primary Job Function

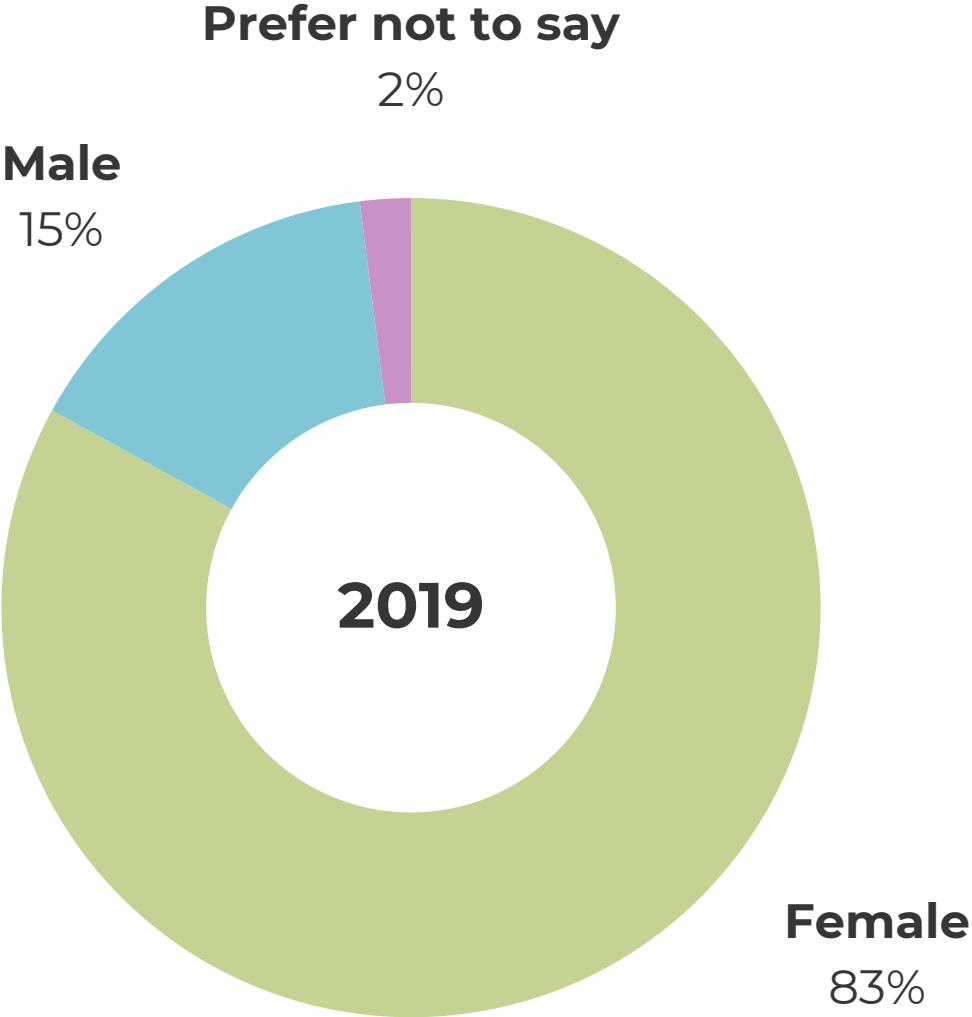

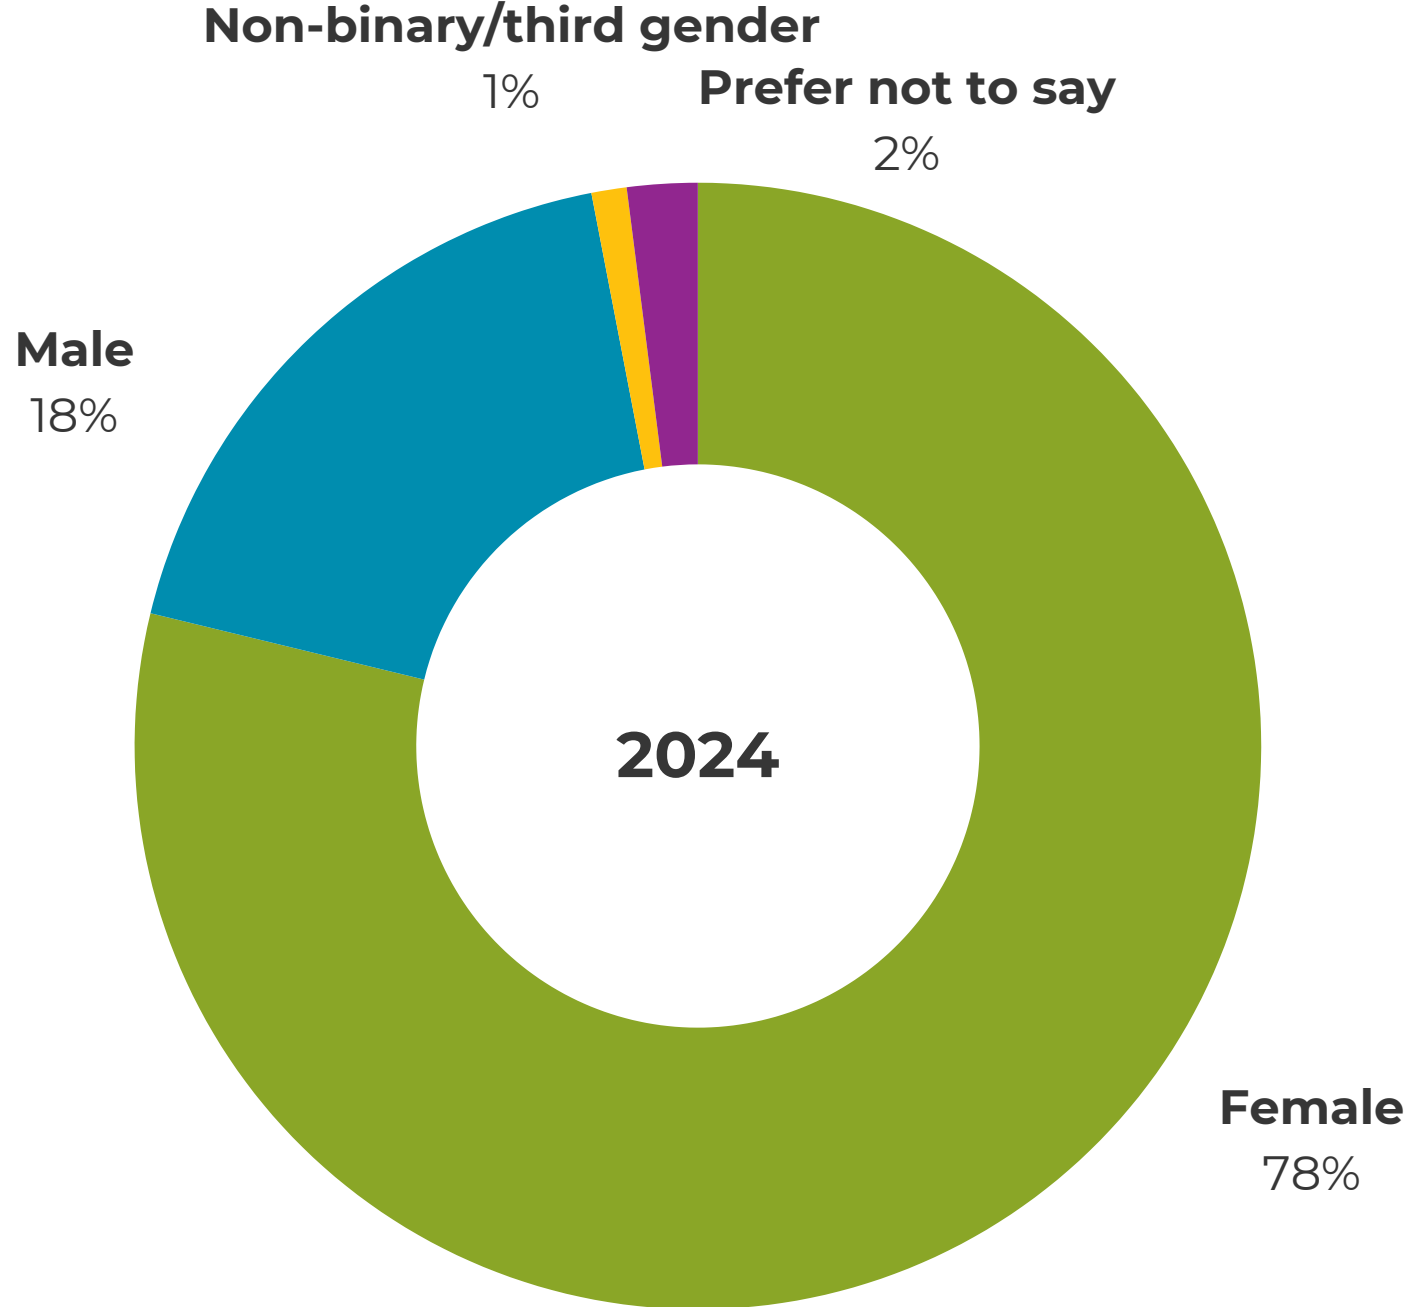

n=932

2019

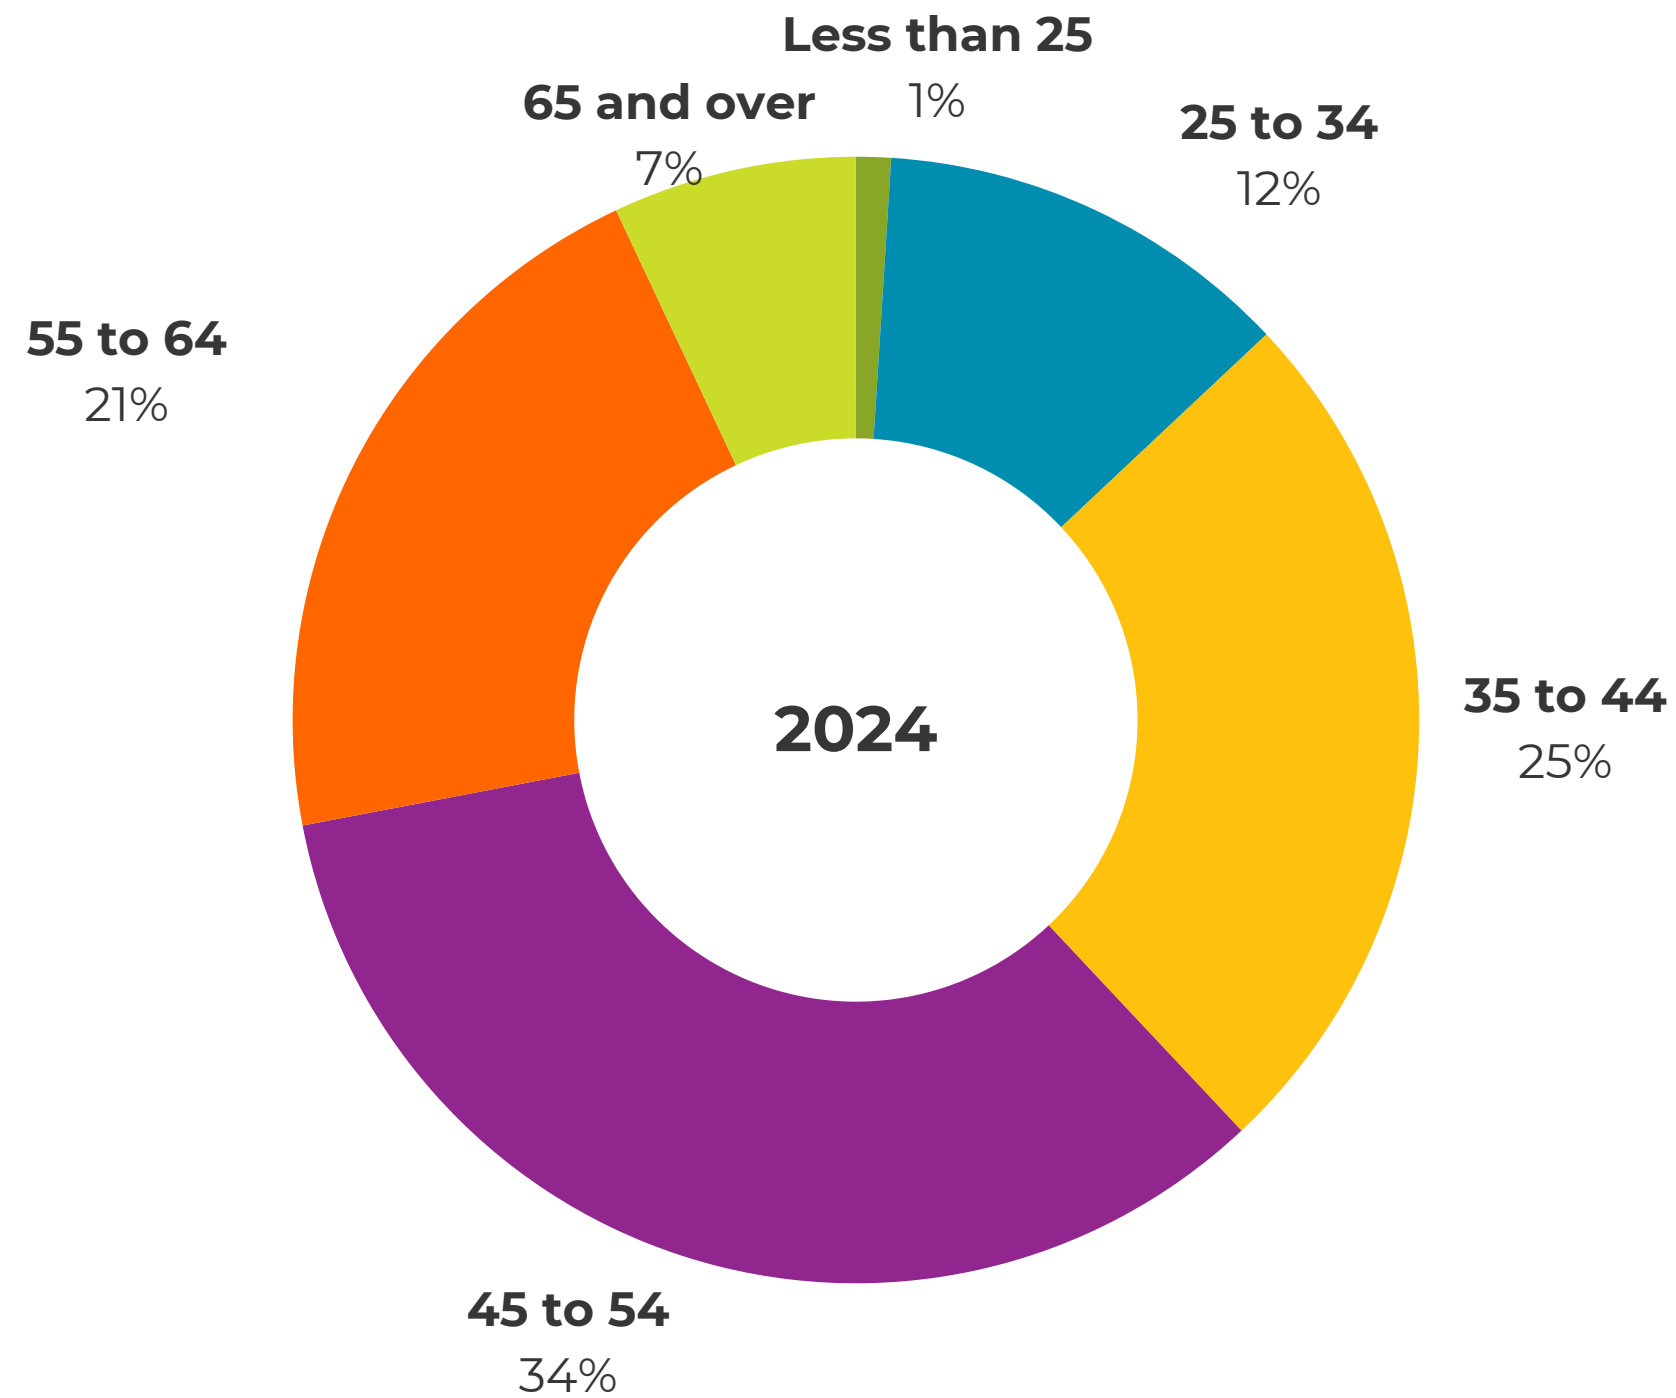

Gender of Respondent

n=750

Age of Respondent

n=750

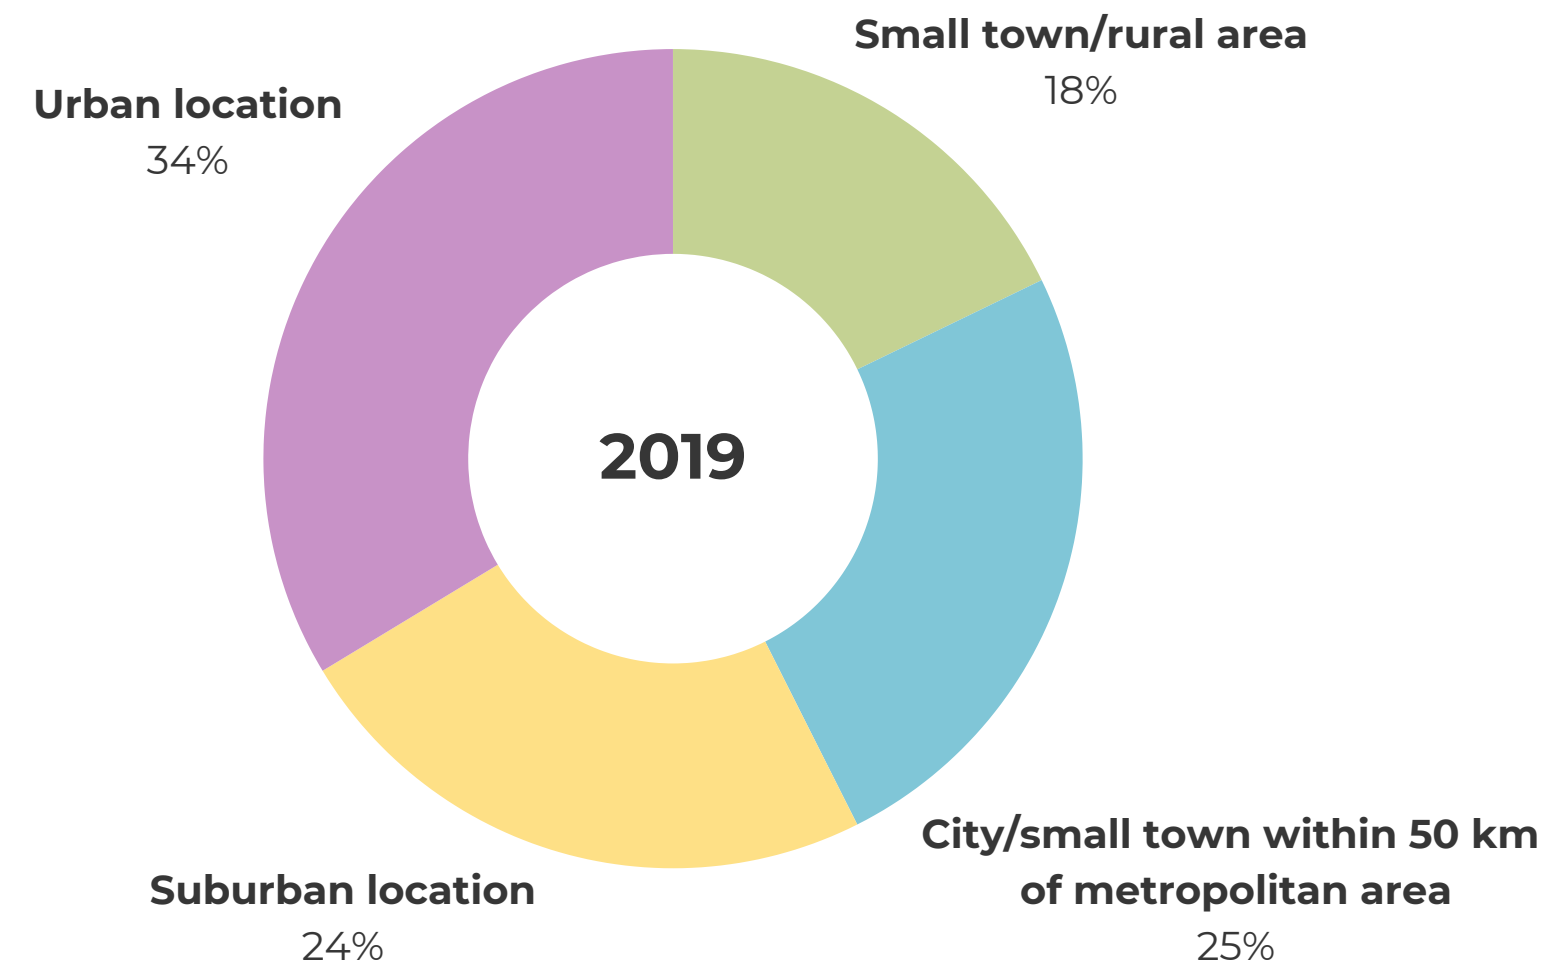

Location of Respondent

n=751

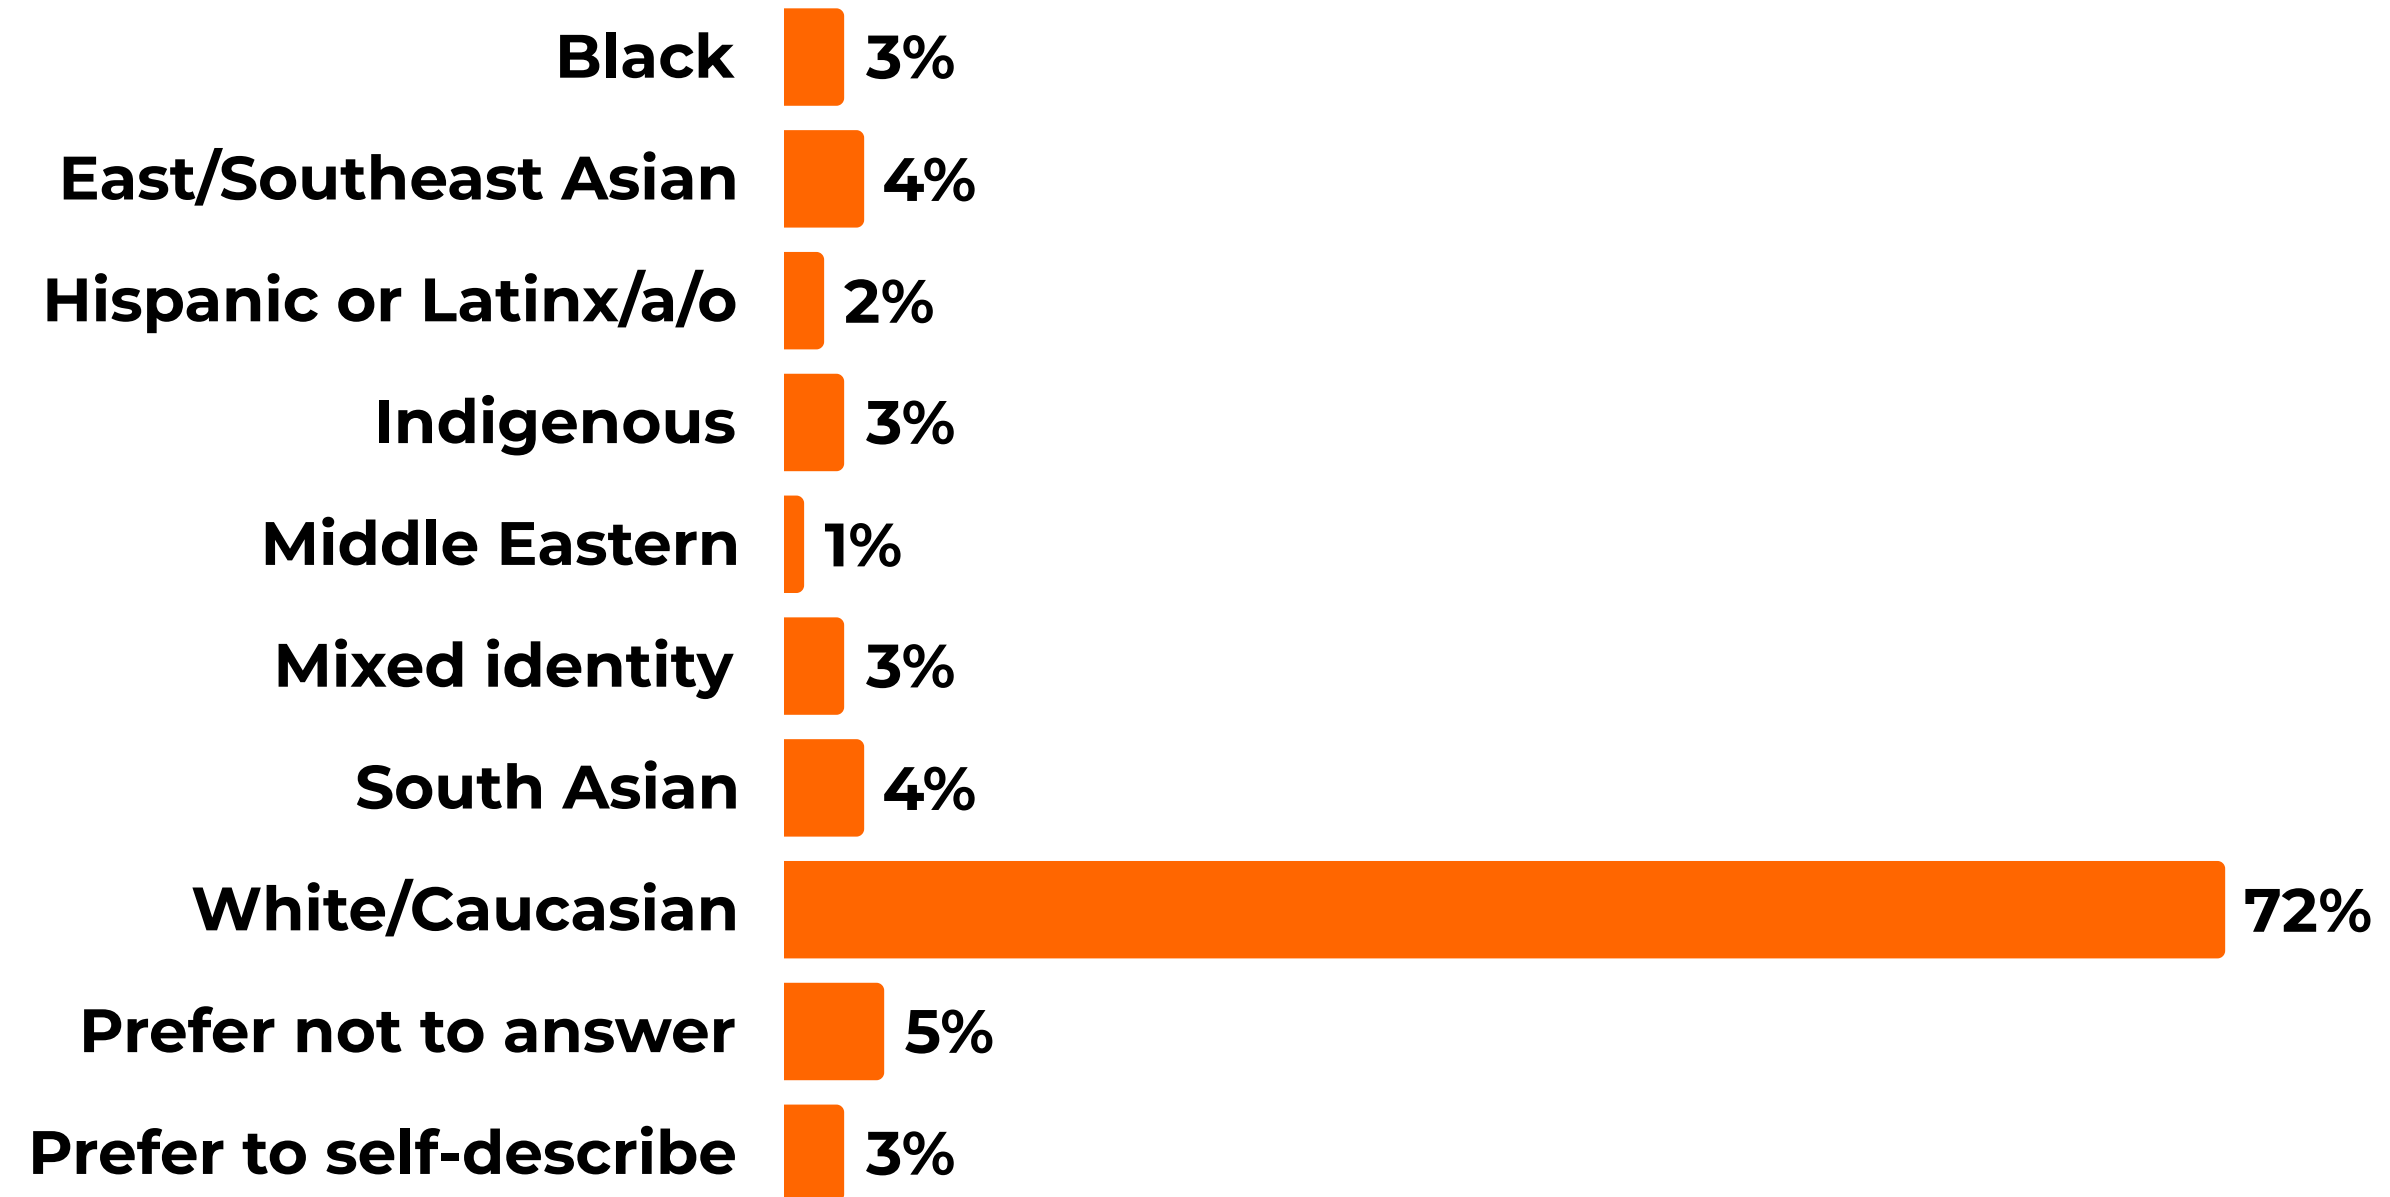

Type of Community

n=749

Ethnic Identity of Respondent

n=747

Self-Identify as Living with Disability

n=749

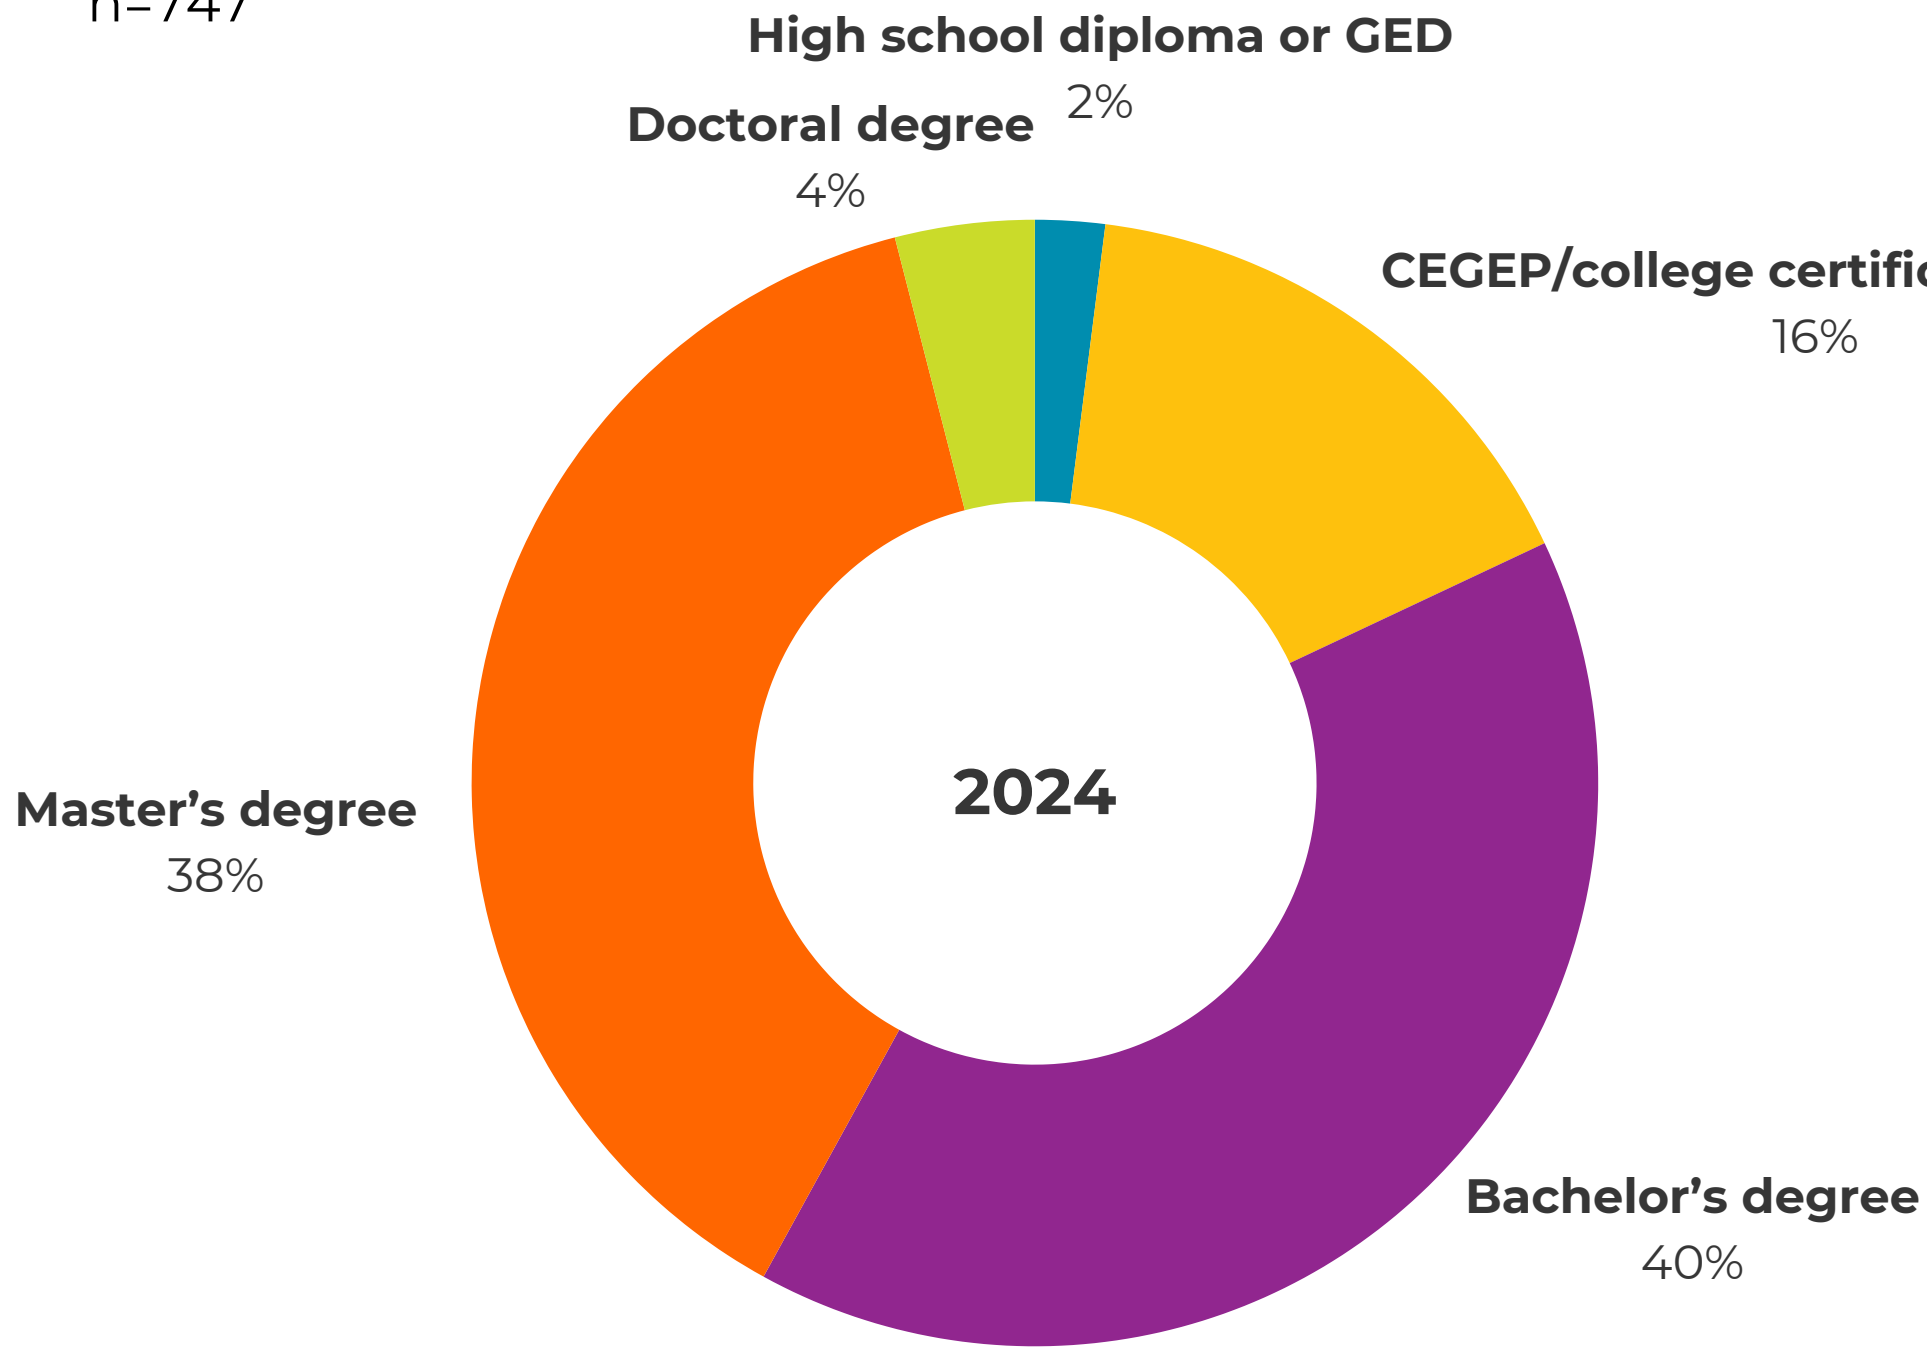

Language(s) of Respondent

n=751

Education Level of Respondent

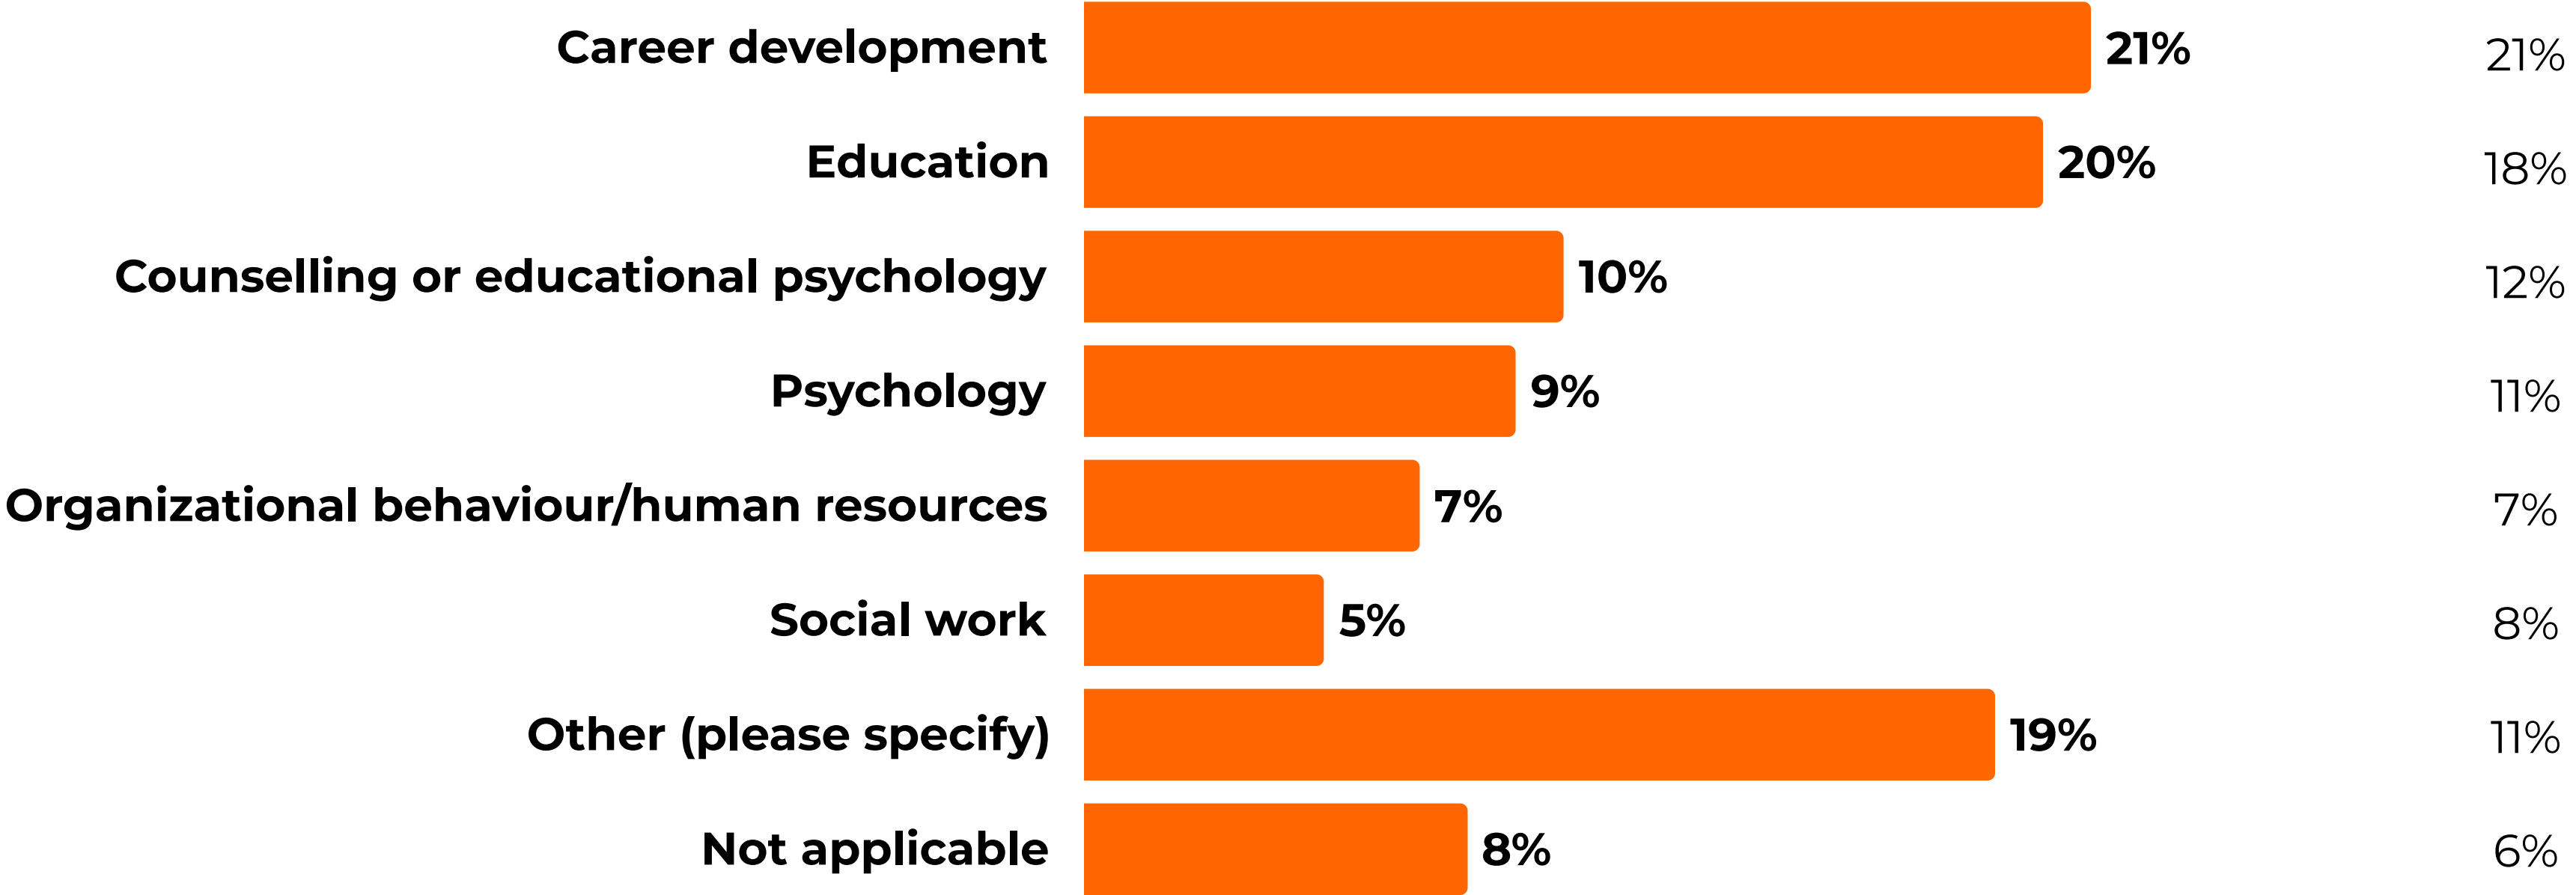

n=747

Main Area of Focus in Education

n=742

2019

Popular other responses: Sociology (1%), business administration (1%) and communications (1%).

Gross Annual Income of Respondent

n=745

2019

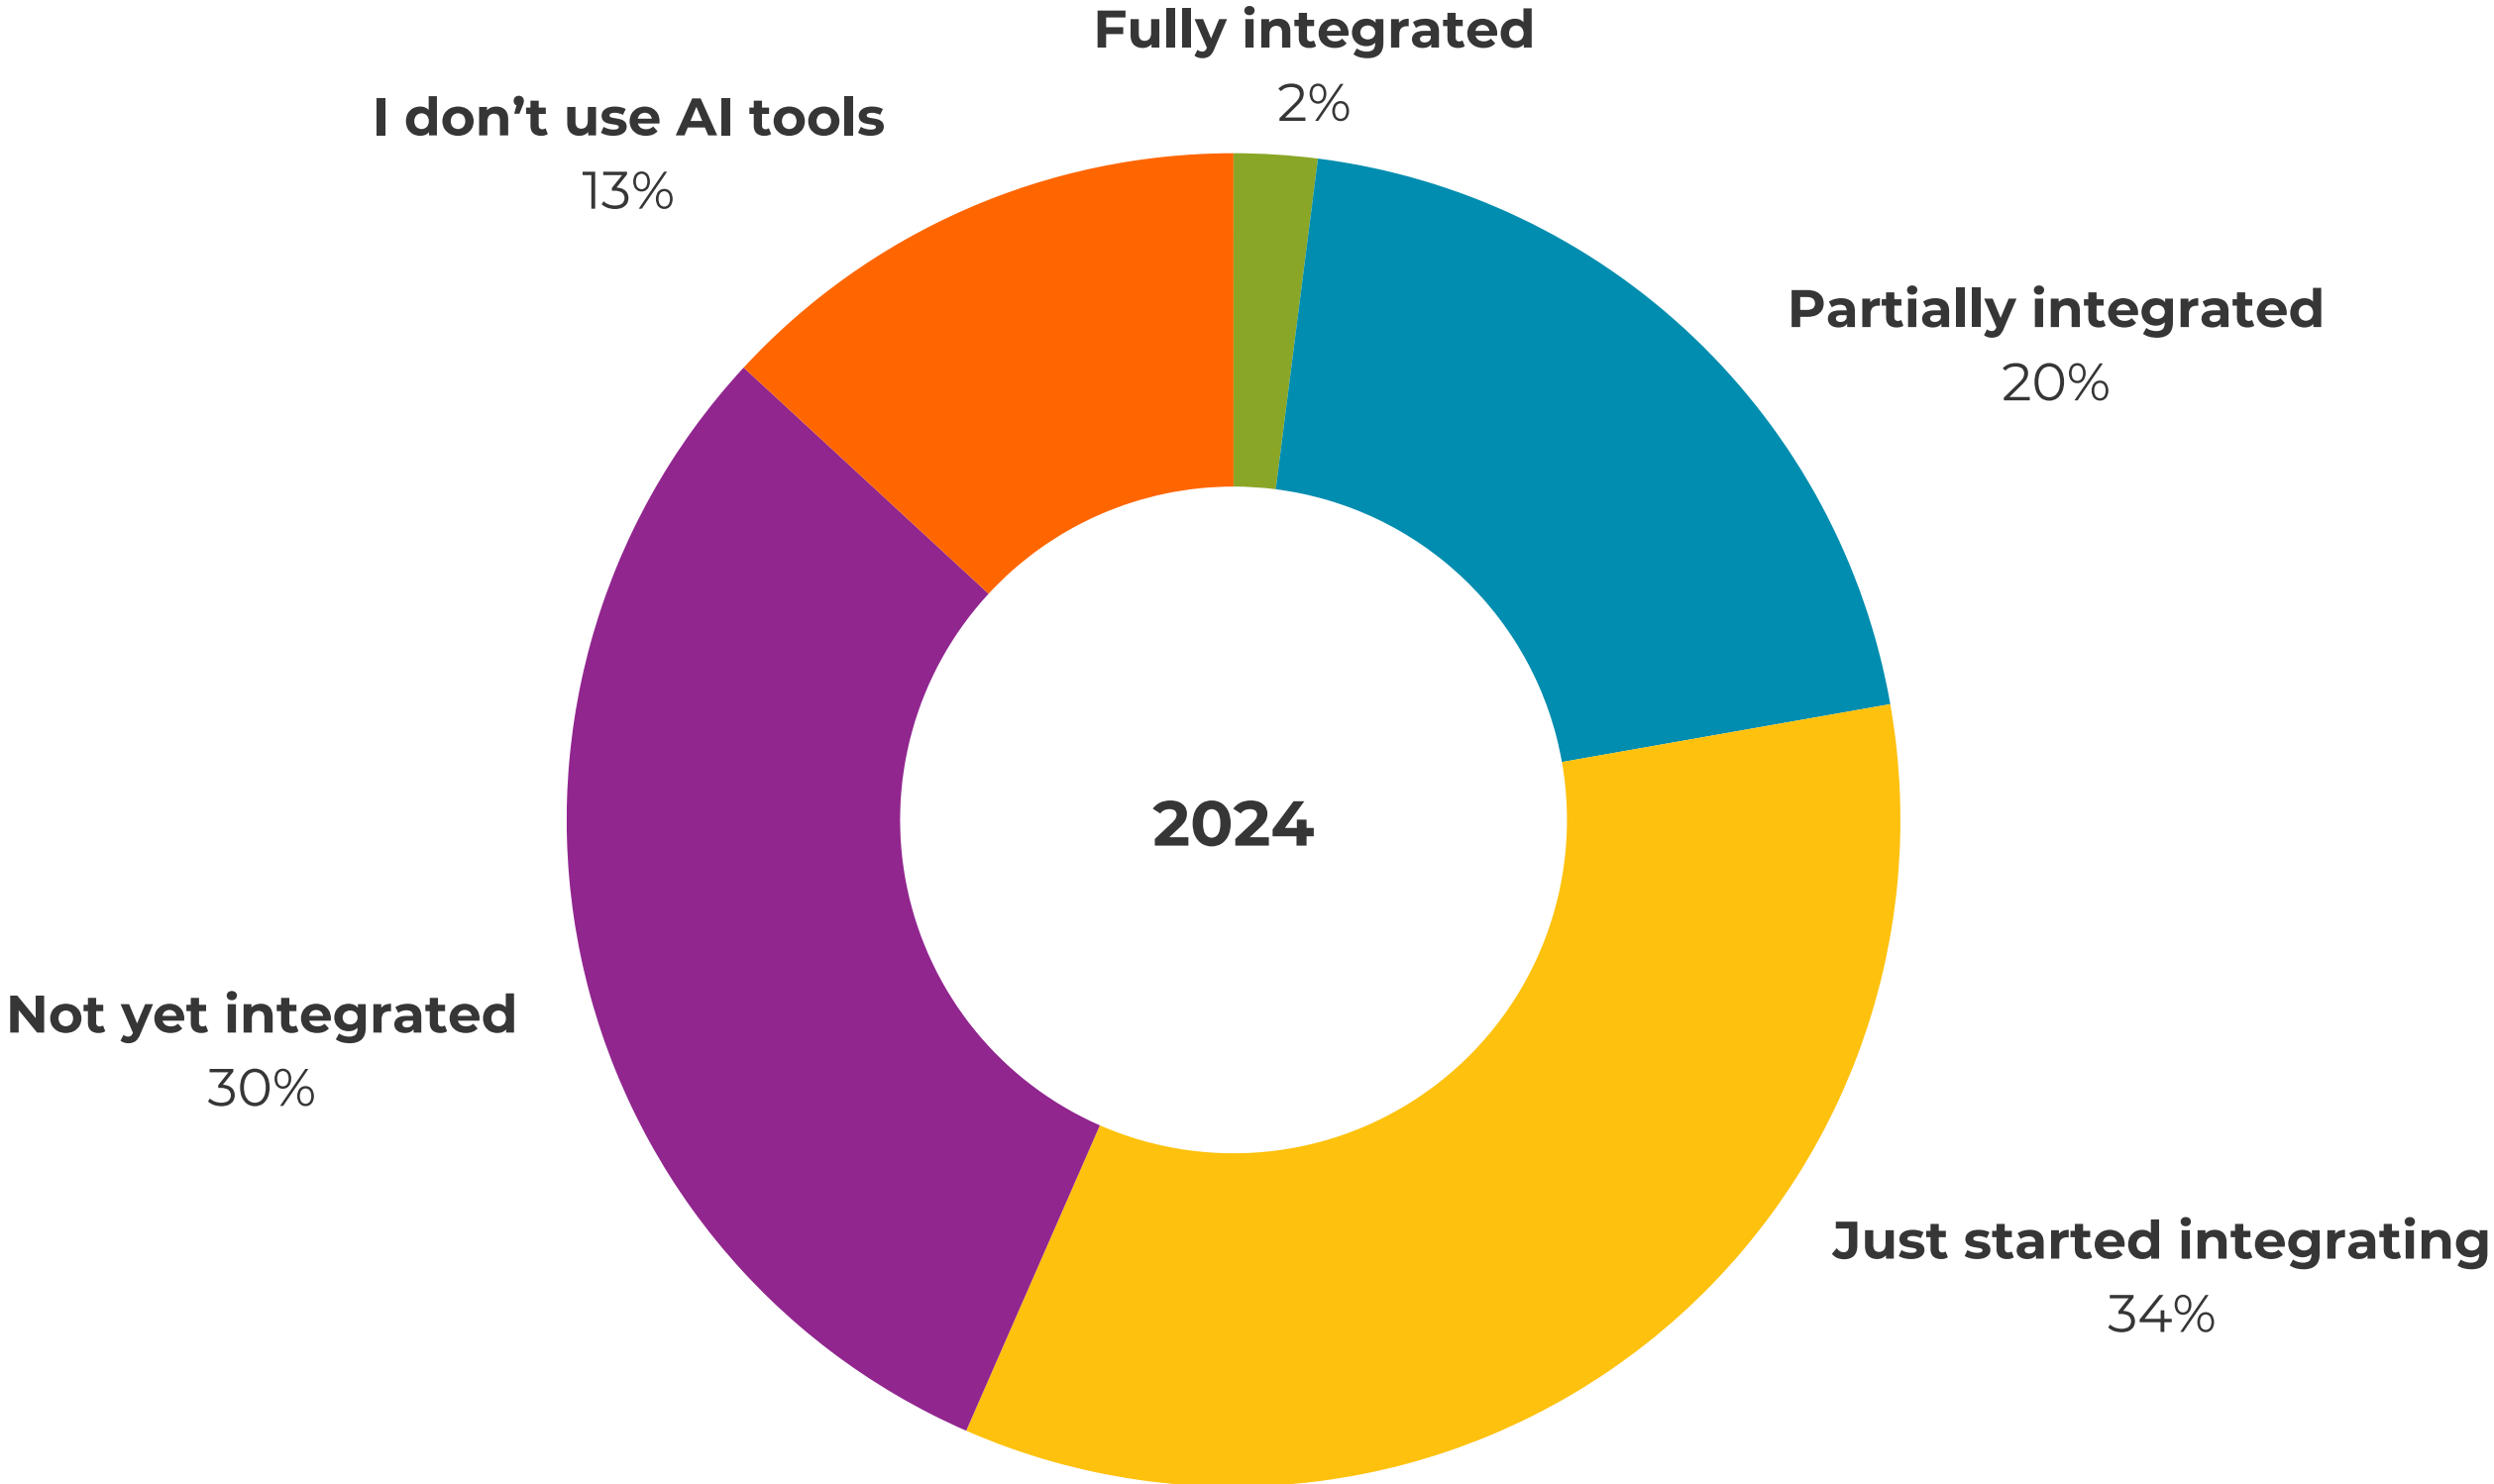

Section 2:
**Artificial Intelligence in the Career
Services Field - Special Section 2024**

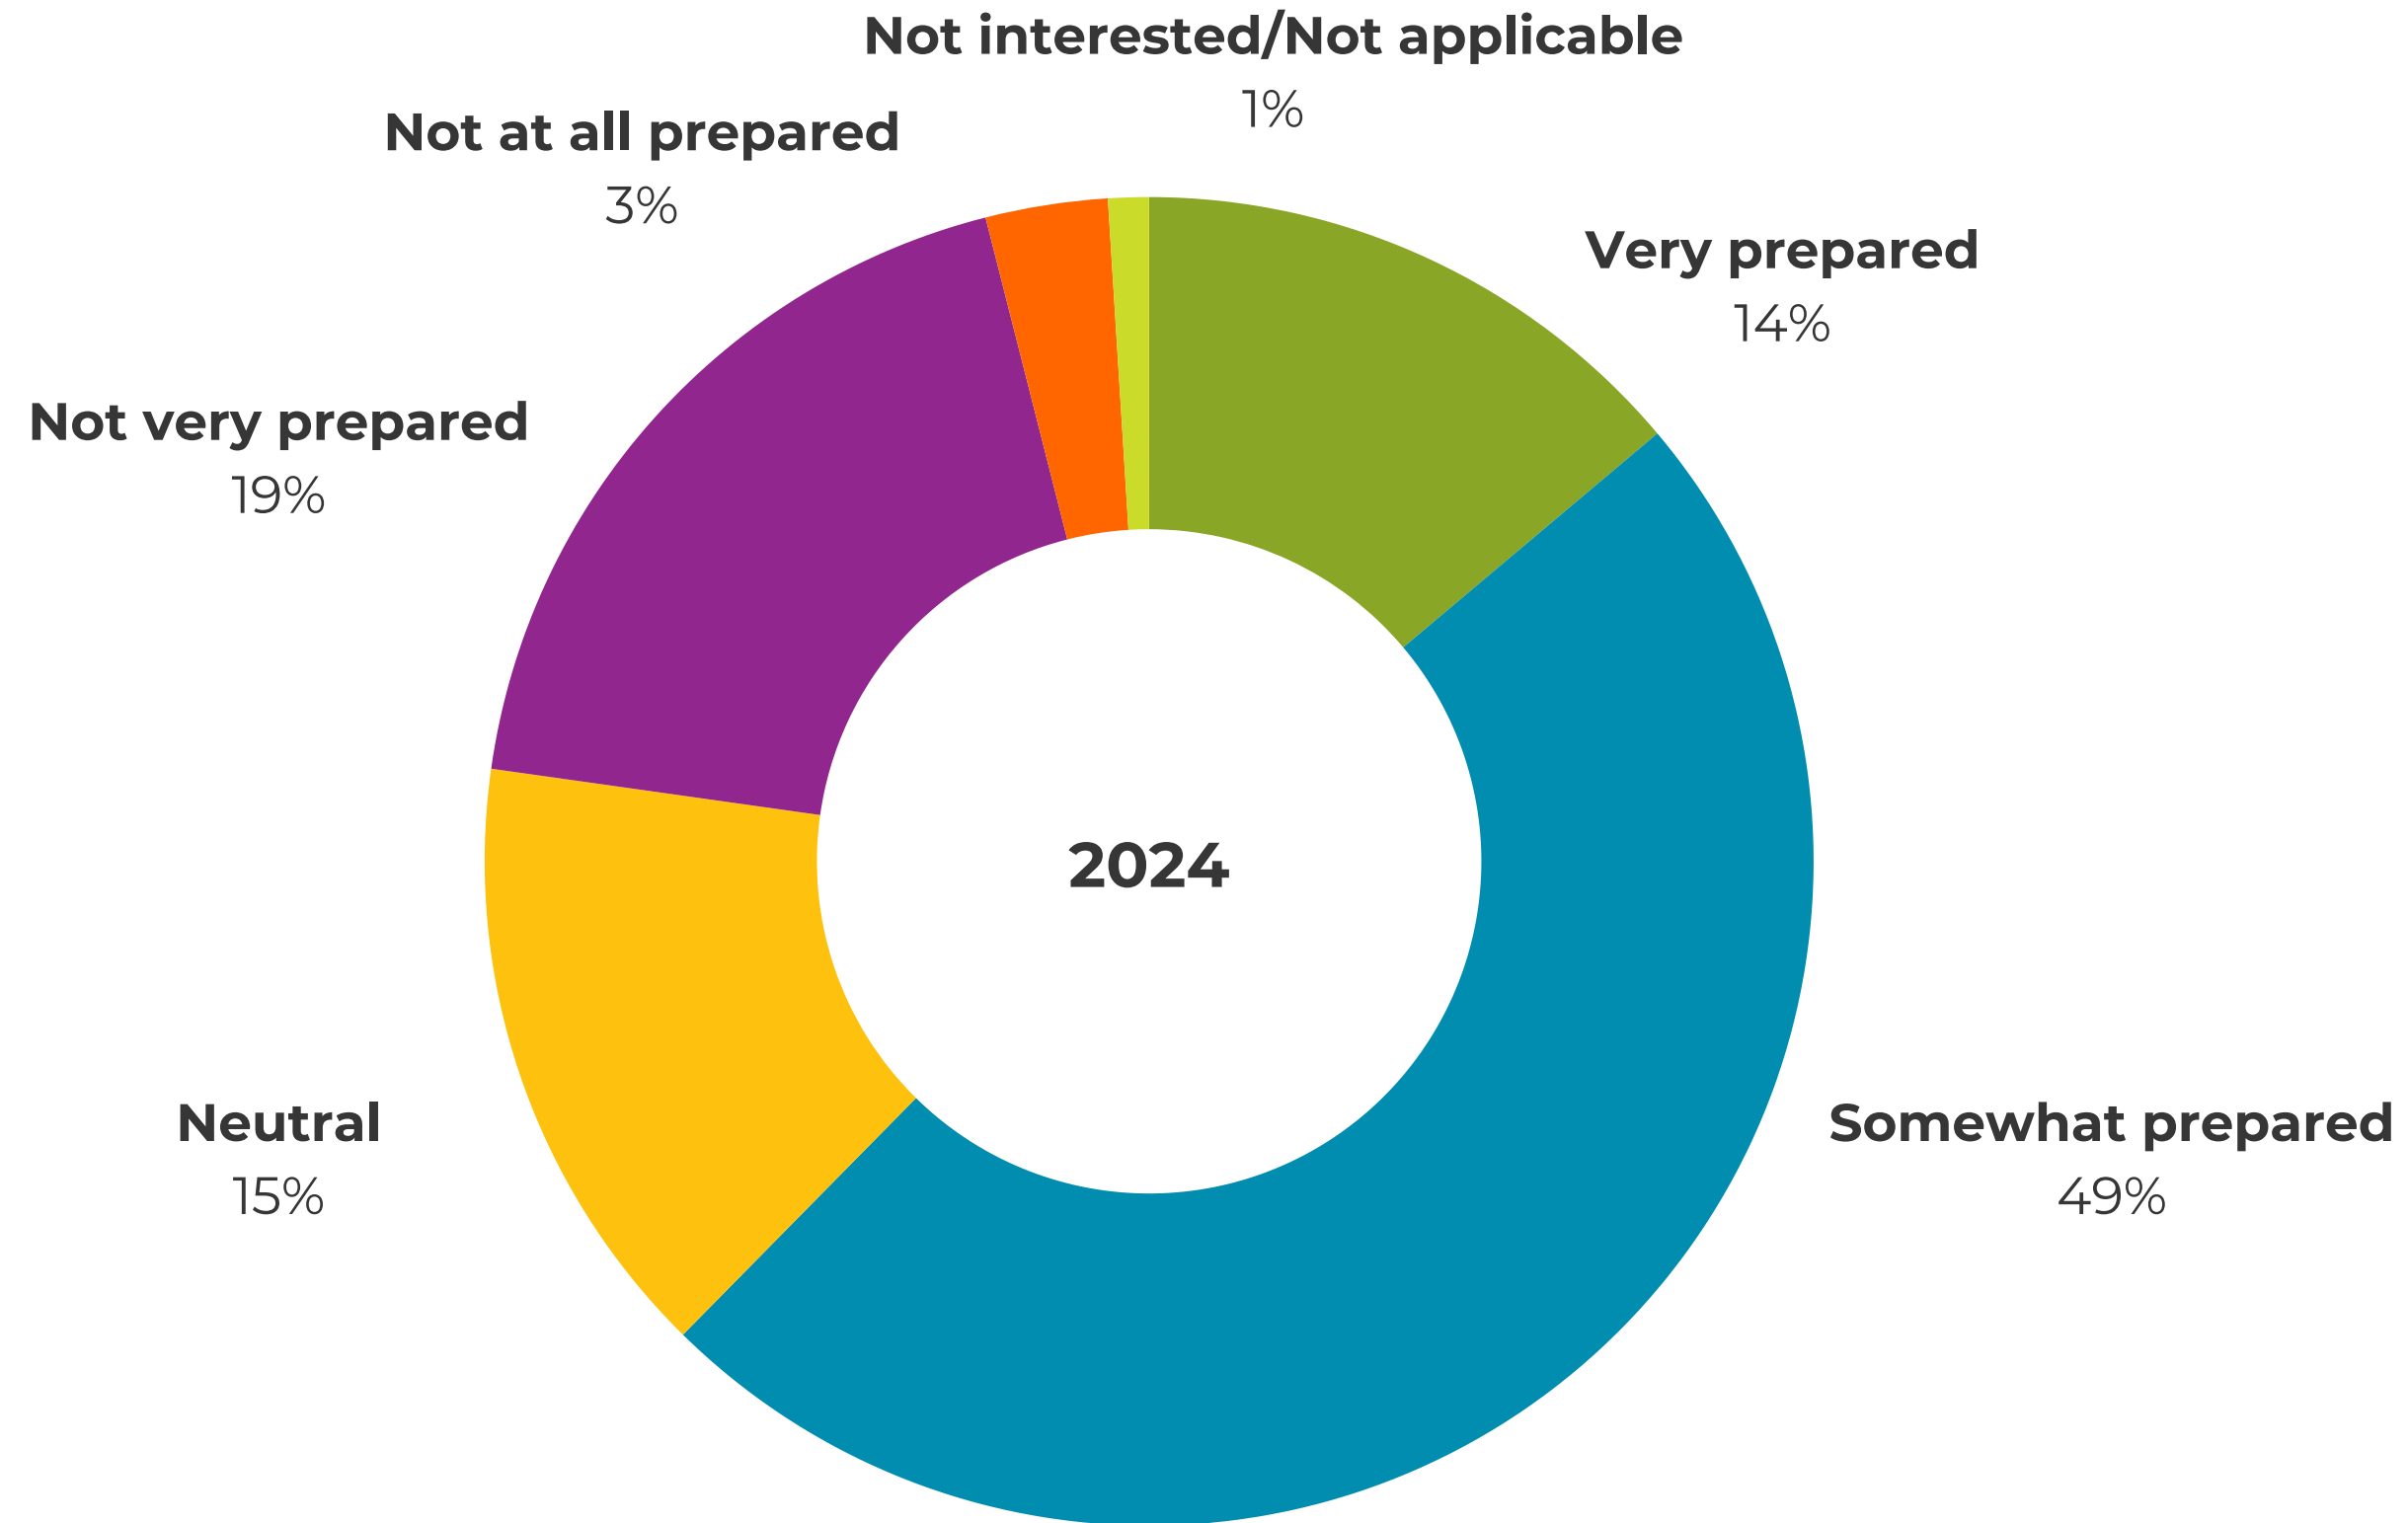

Integration of AI Tools in Field

n=941

Preparedness to Integrate AI Tools (among AI users)

n=521

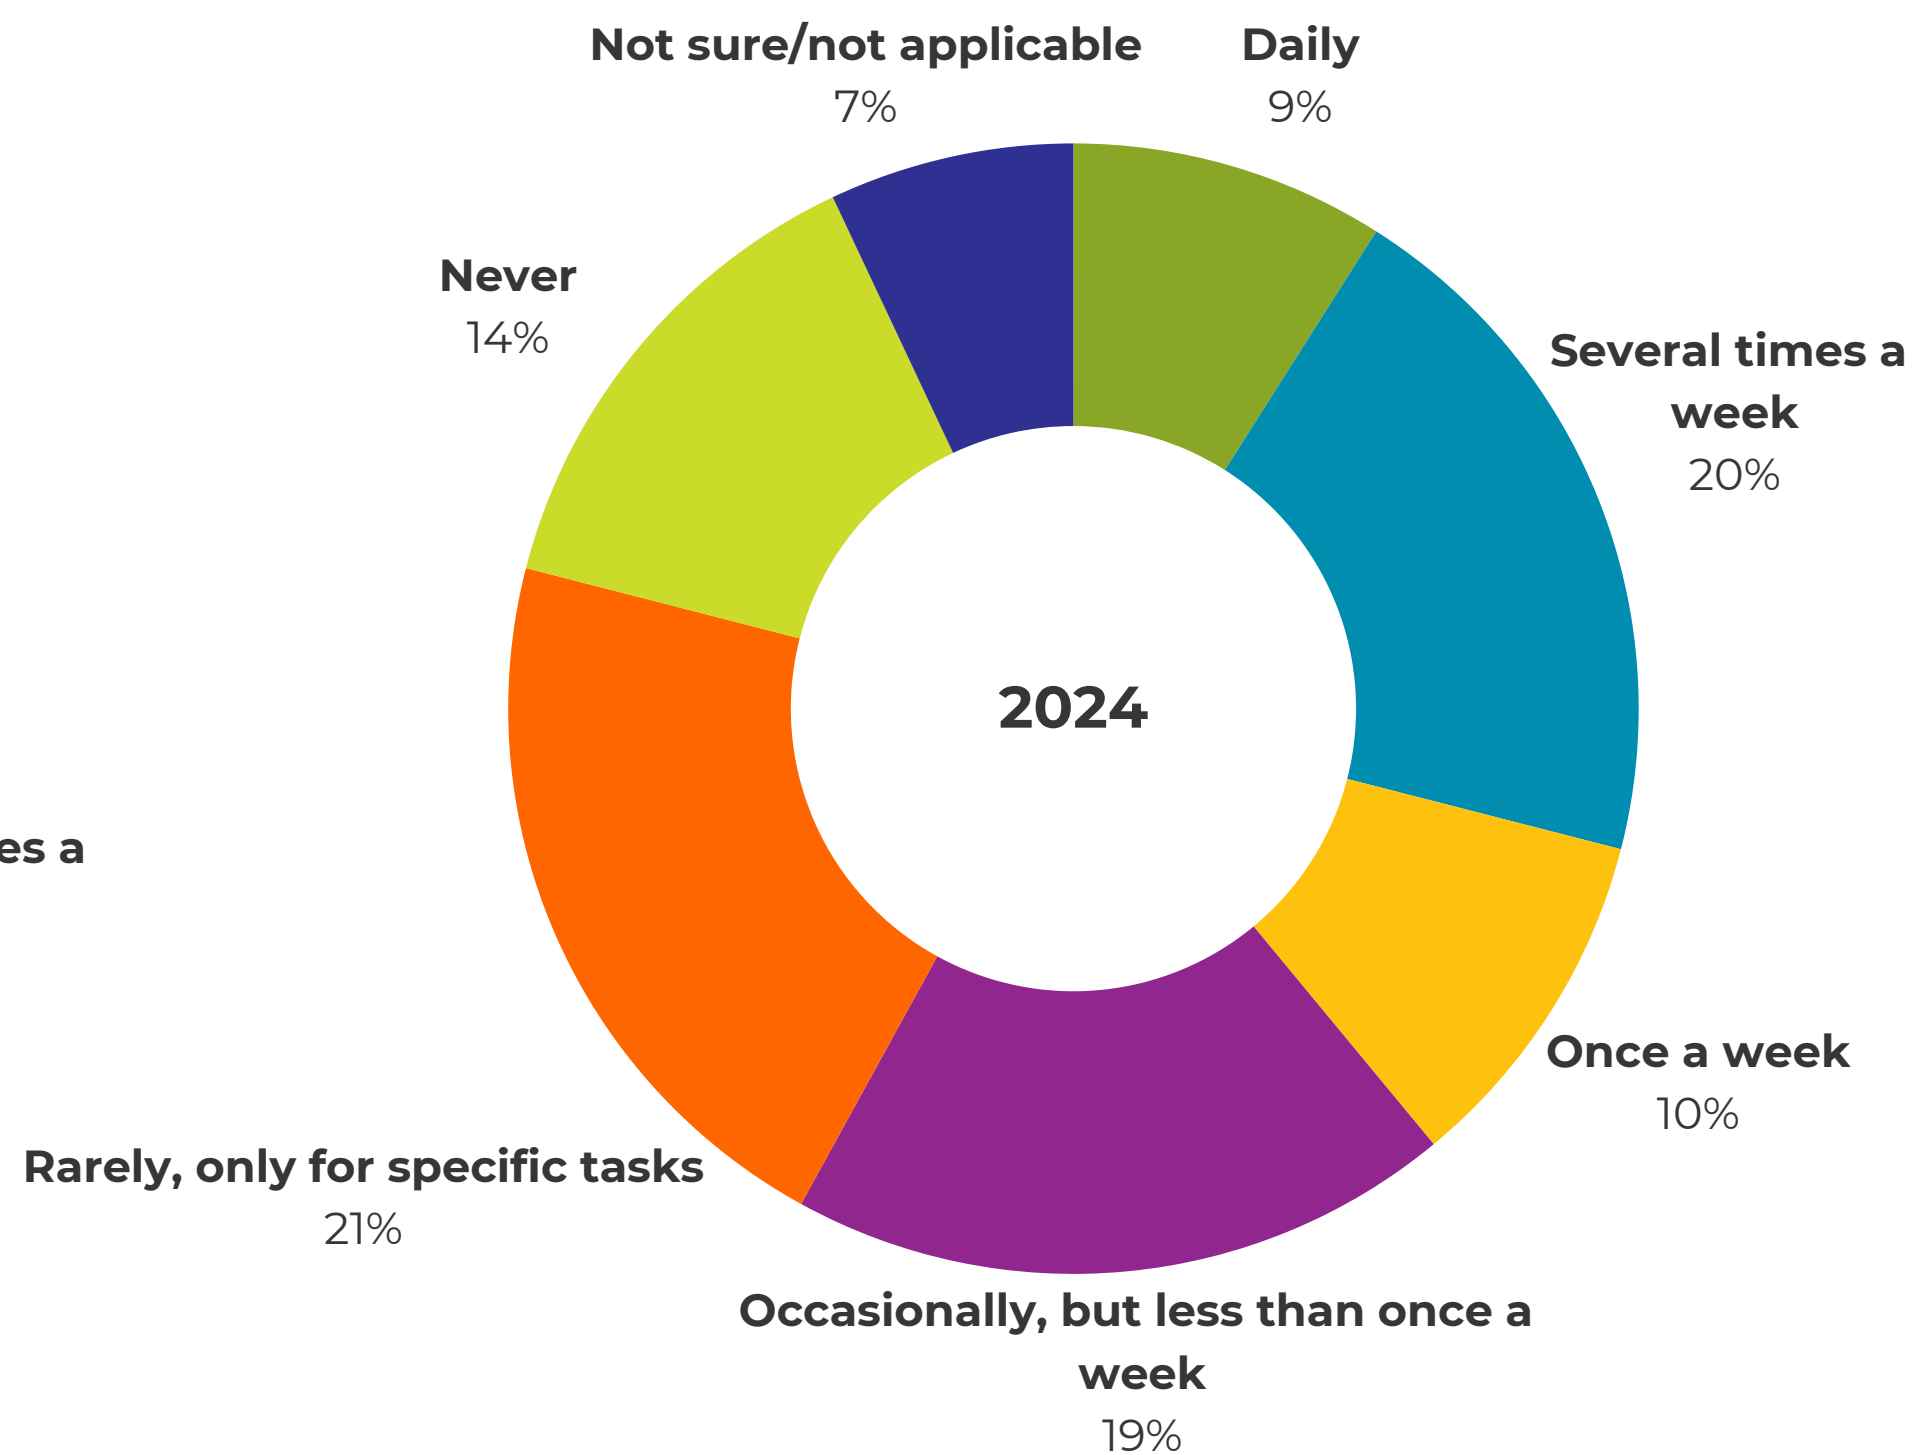

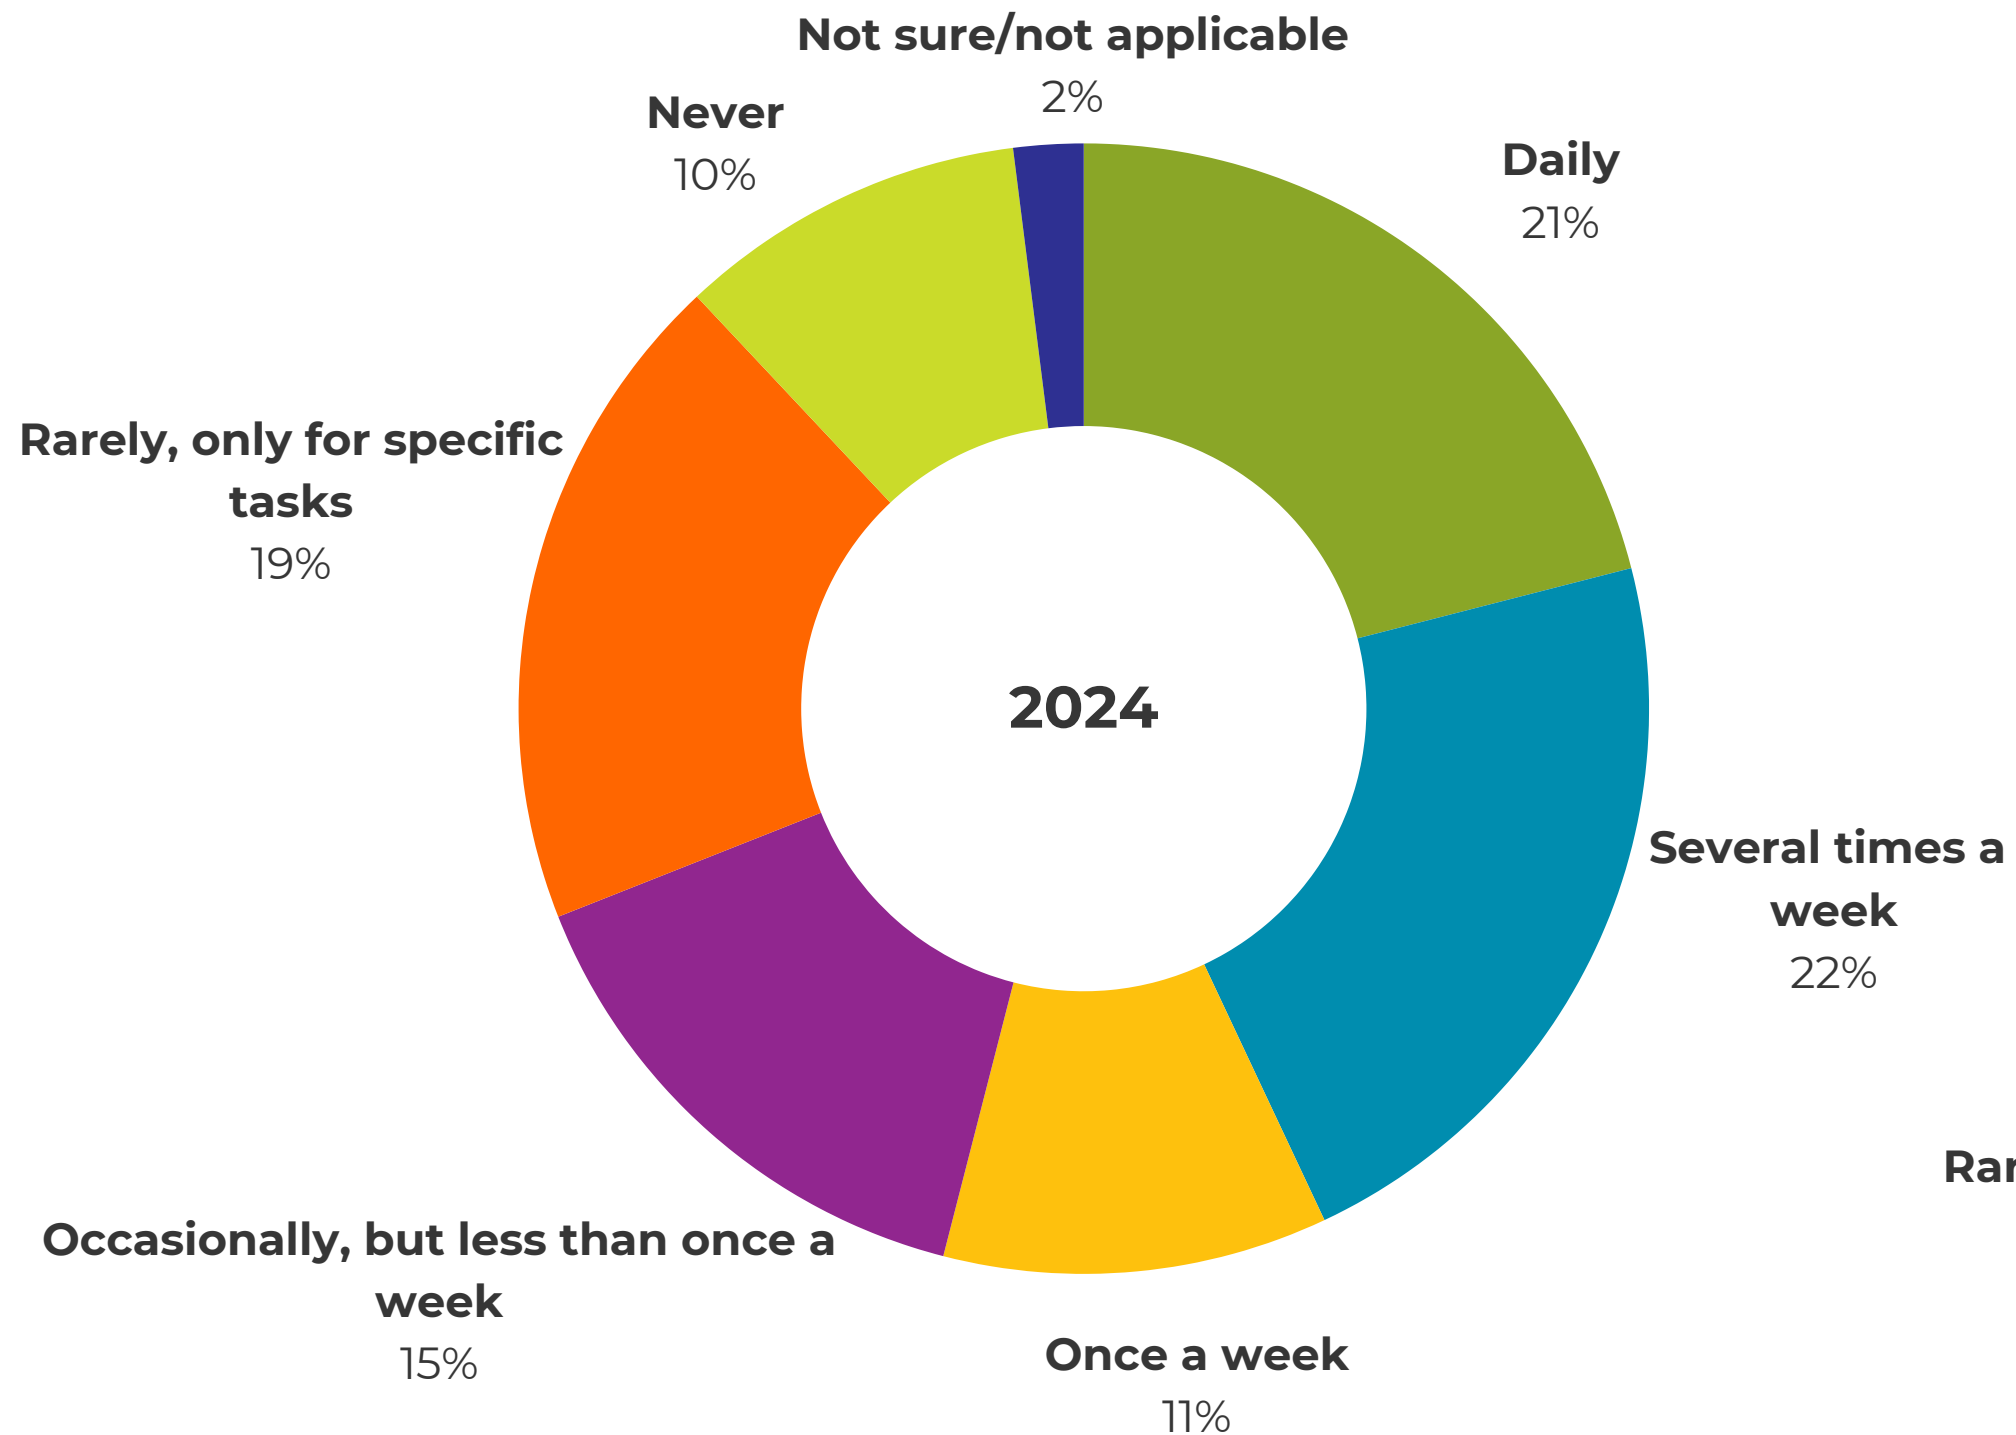

Frequency of Using AI Tools in Field (among AI users)

n=515

Administrative Duties

Direct Client Support

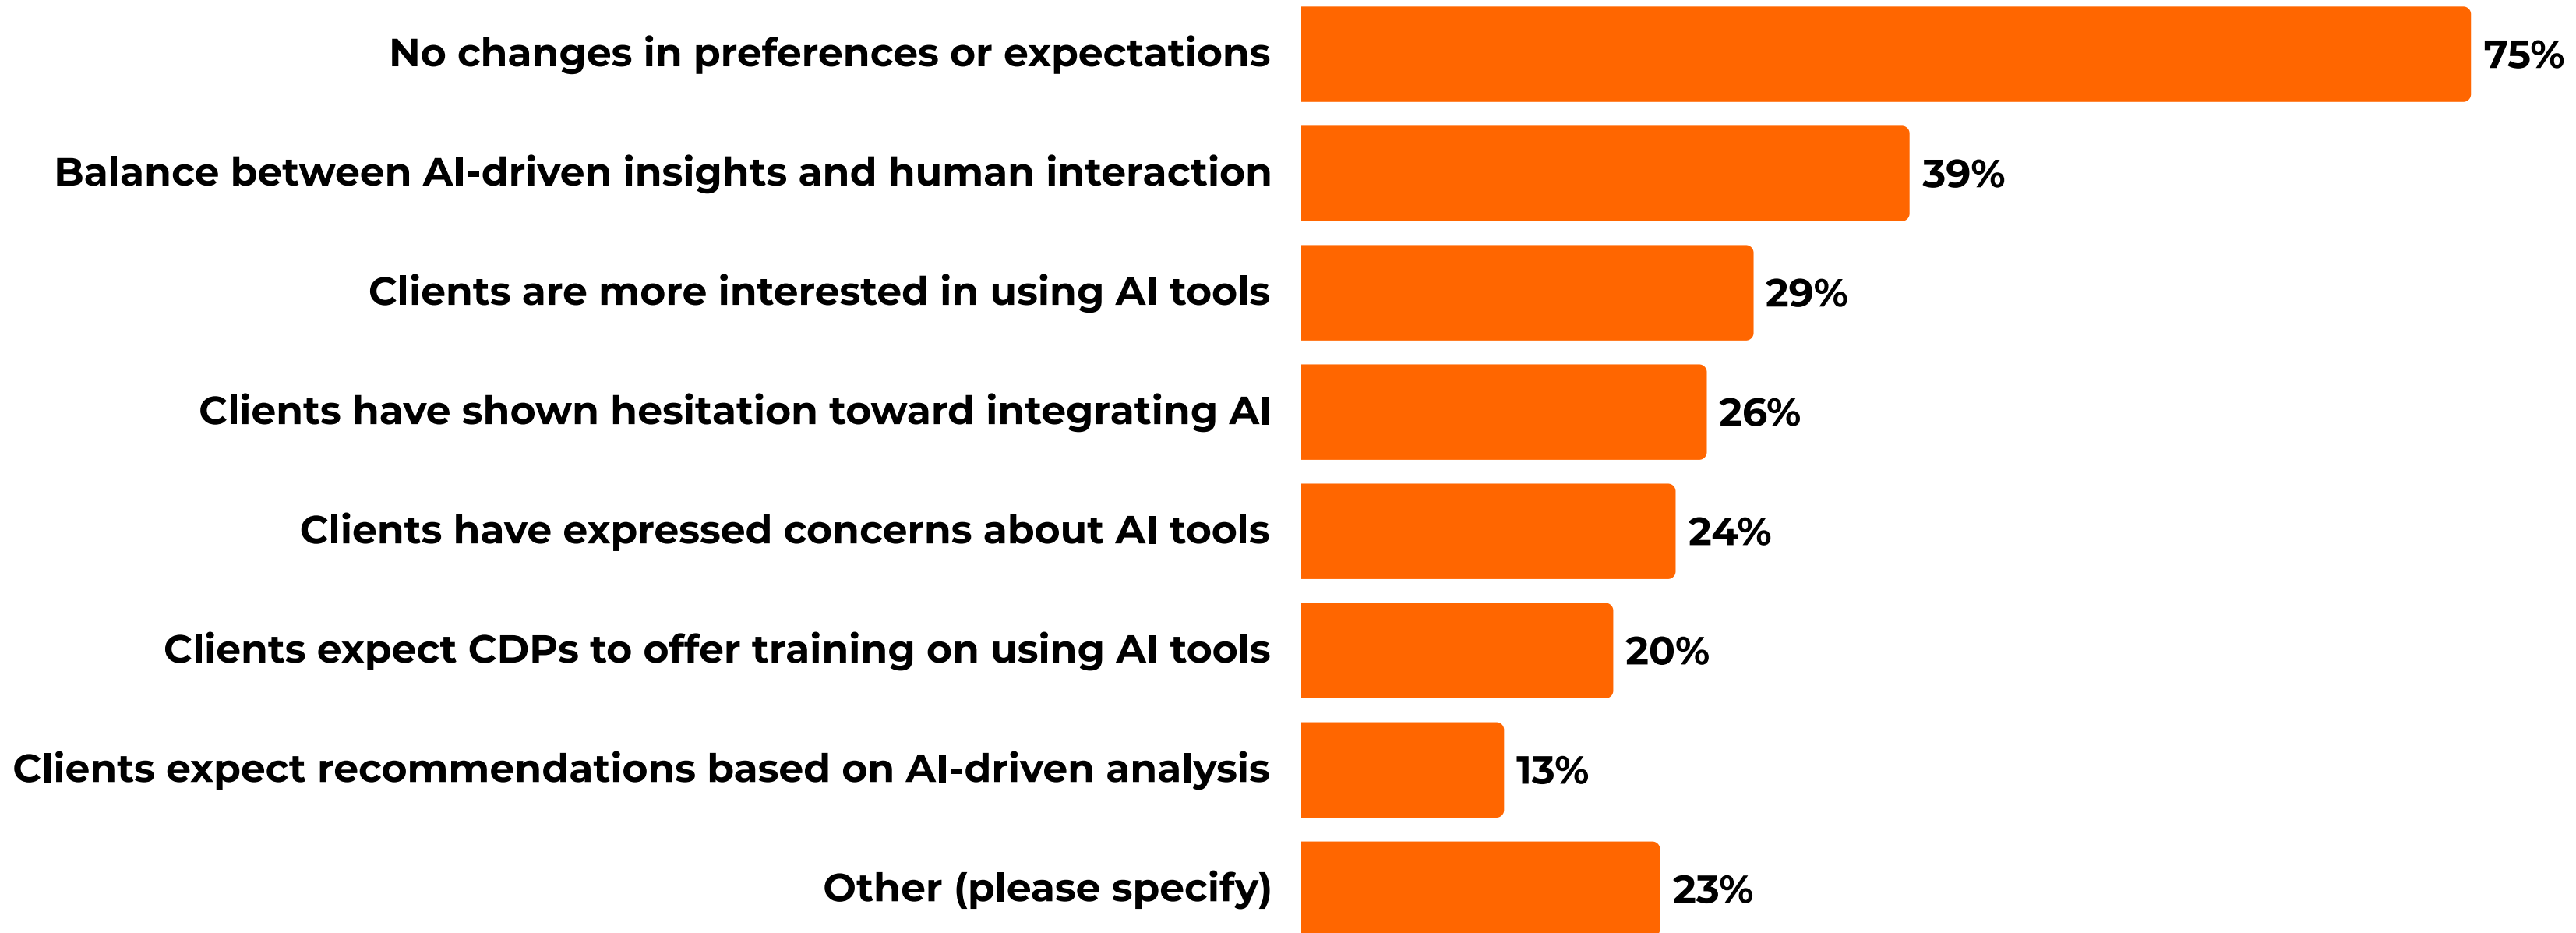

AI Tools Incorporated Into Practice (among AI users)

n=393

Changes in Client Expectations Regarding AI

n=521

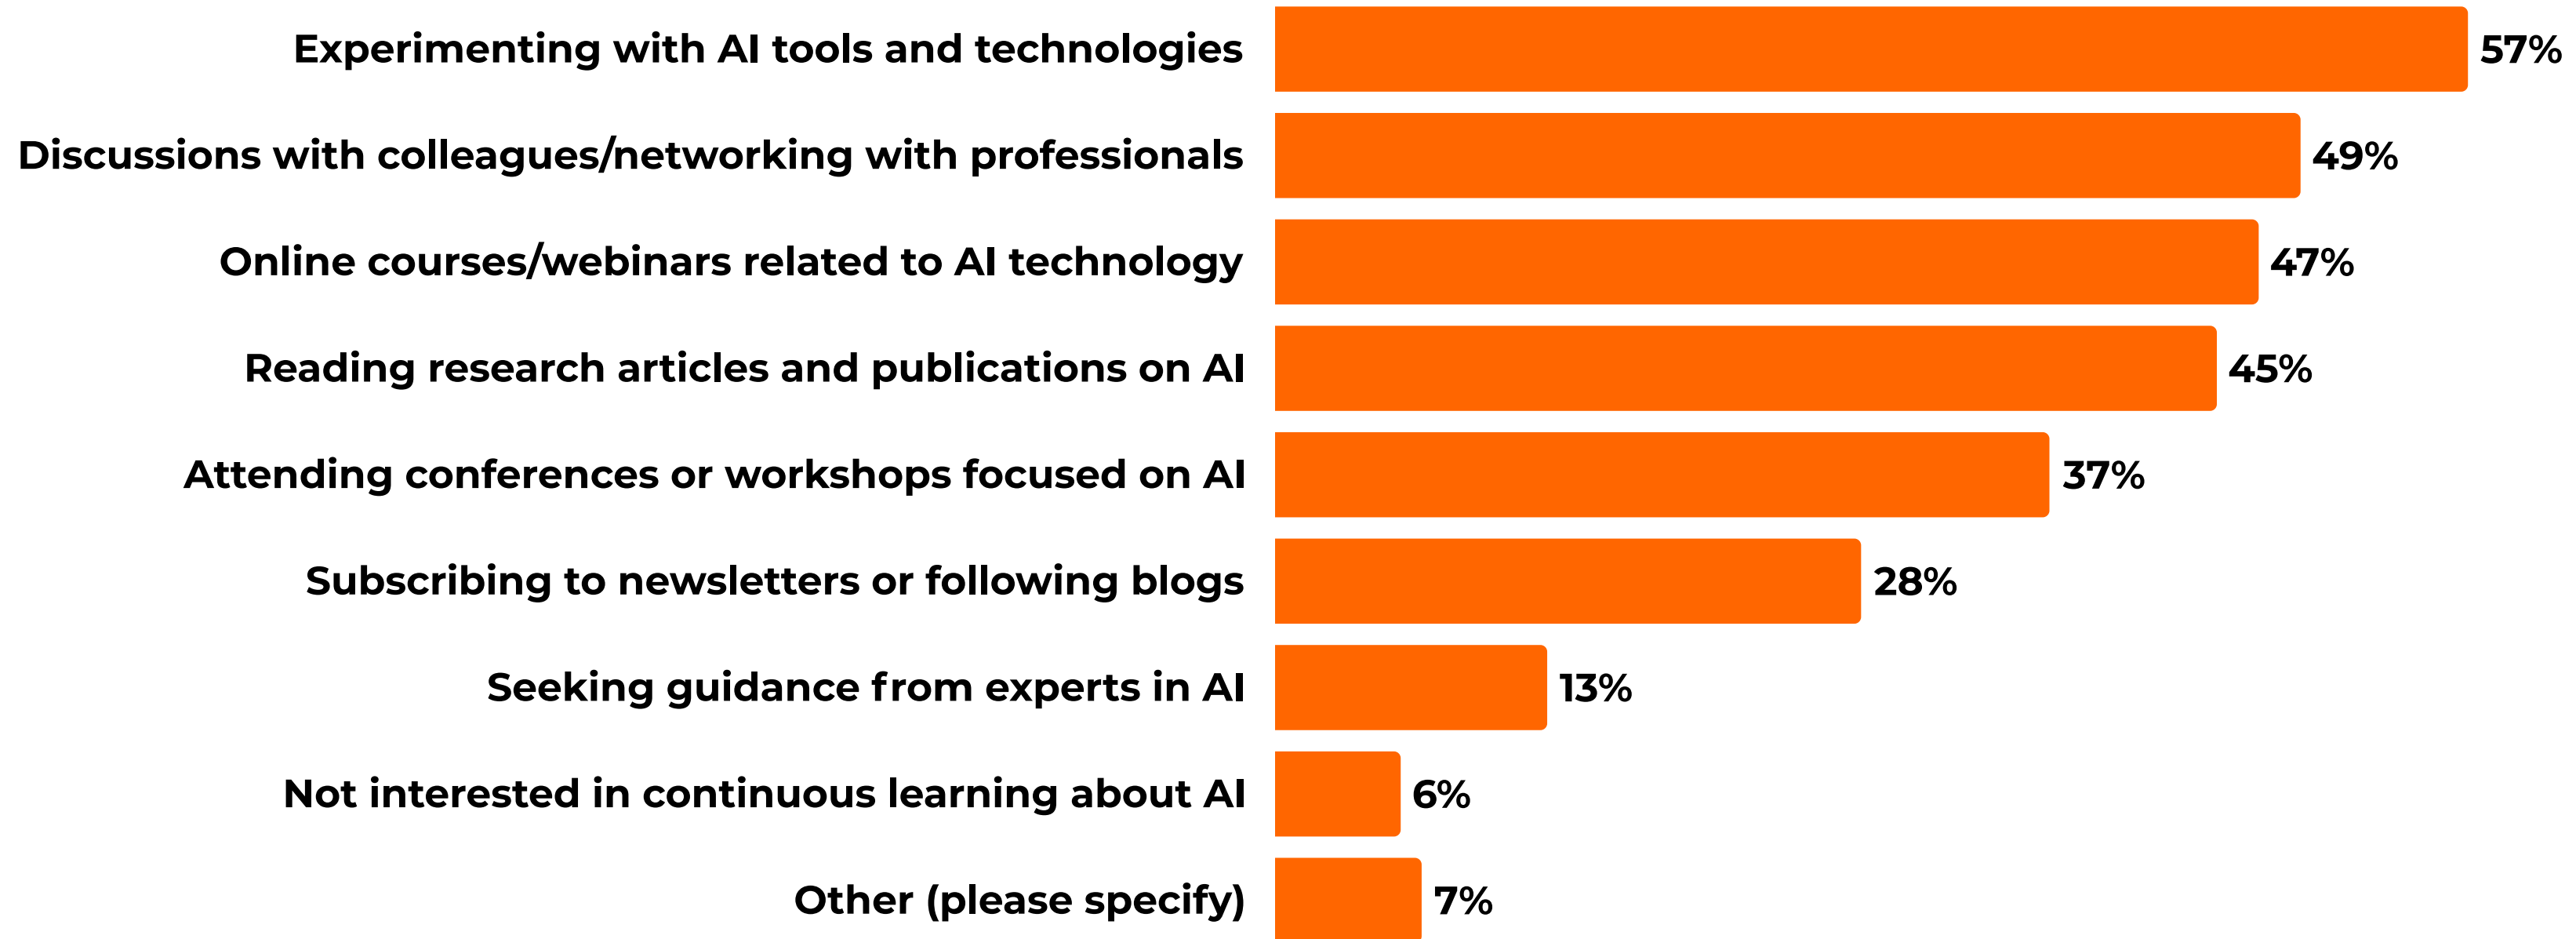

Popular other responses: AI job applications/ using AI for resume and cover letter creation (10%) and lack of familiarity with AI (2%).

Note: For this question respondents could check all that apply. In these instances, percentages do not add up to 100%.

Methods of Staying Updated on Advancements in AI

n=862

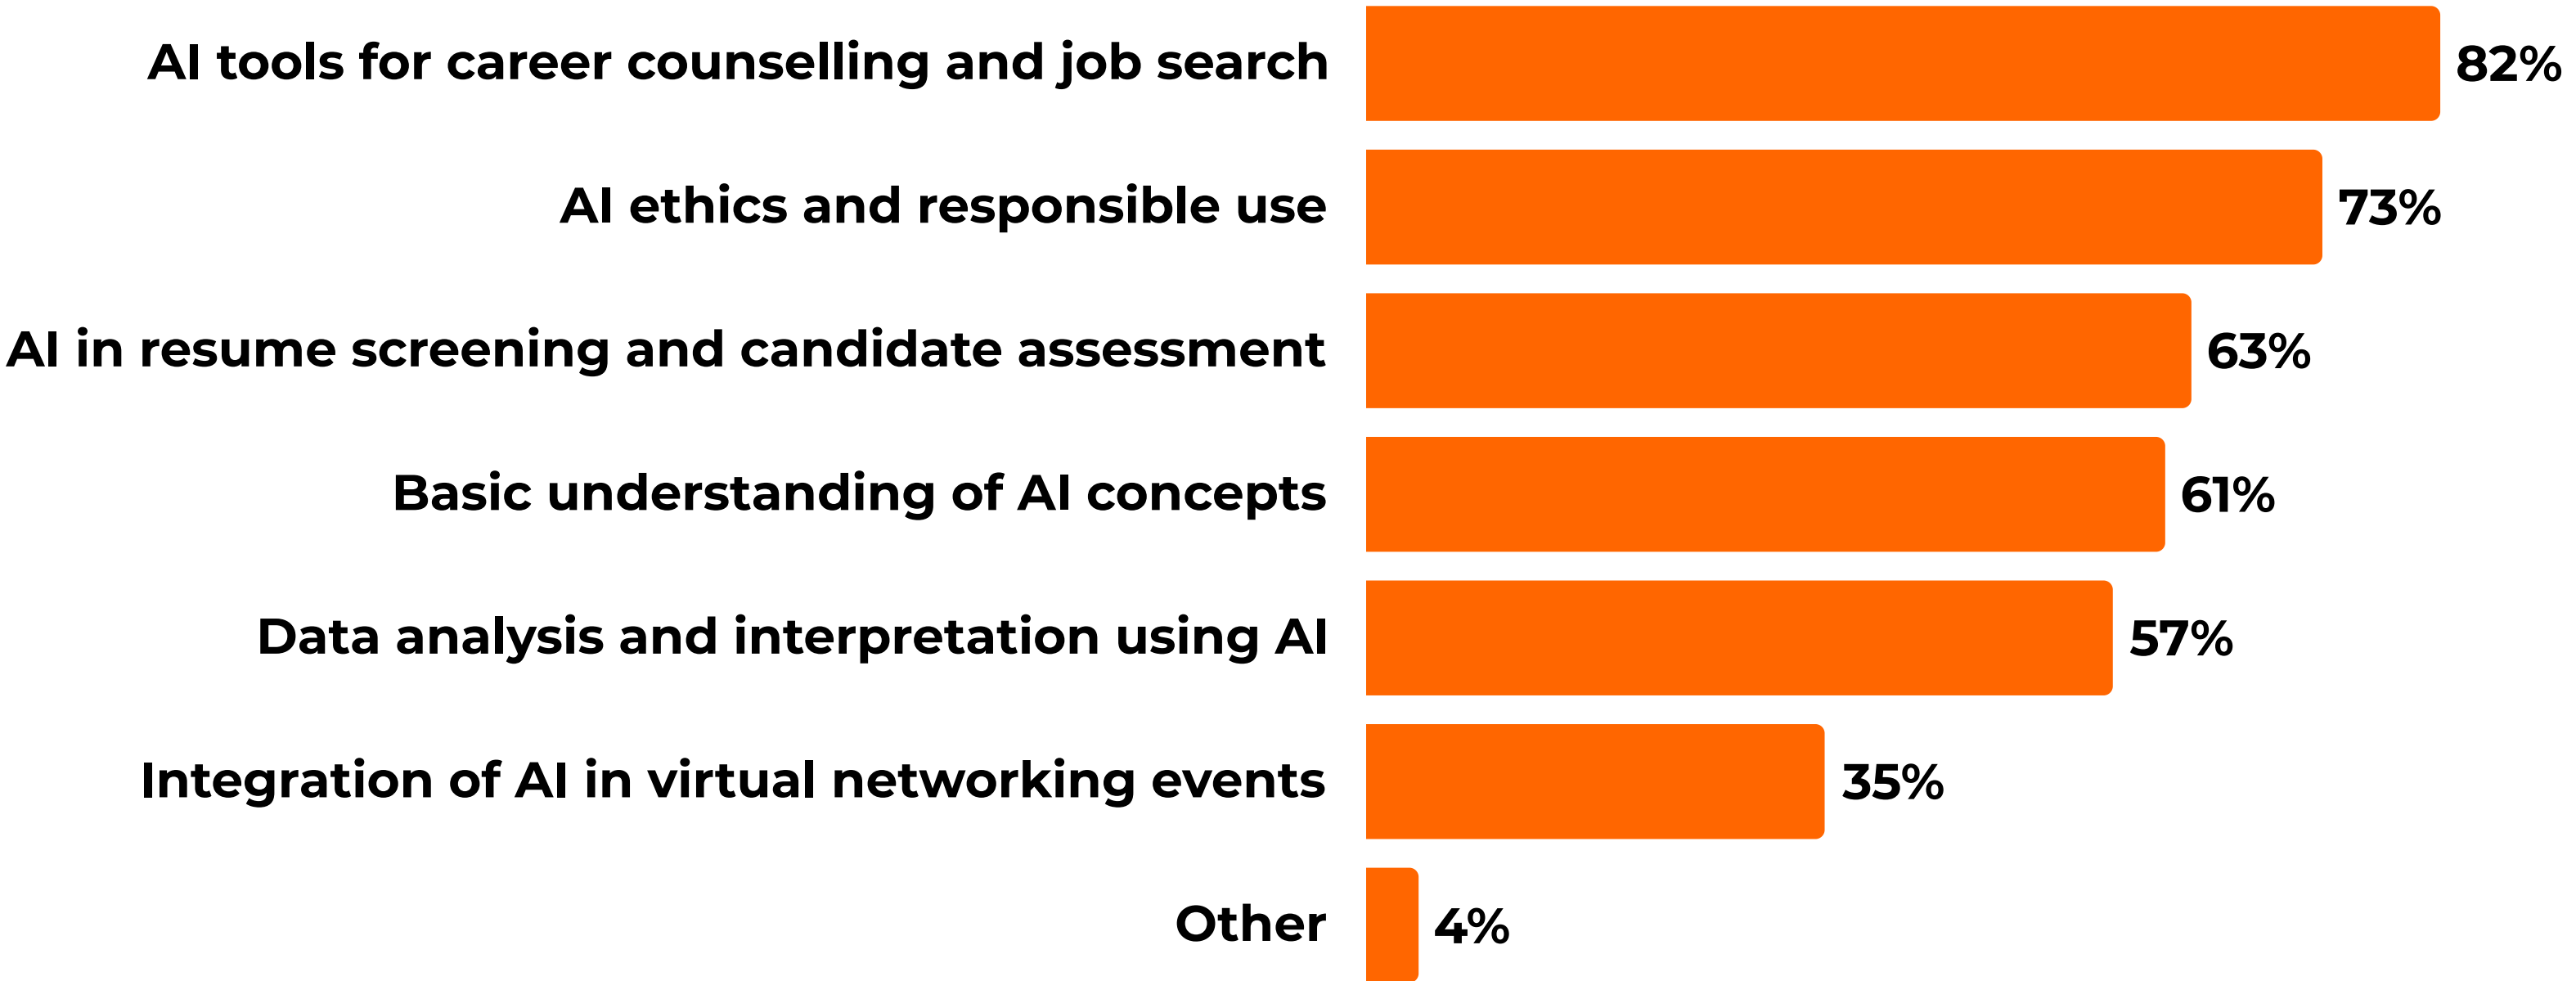

Popular other responses: Not yet engaged in AI technology (1%), interested but haven't had time (2%) and personal research on AI (1%).

Note: For this question respondents could check all that apply. In these instances, percentages do not add up to 100%.

Types of AI Training Considered Necessary

n=862

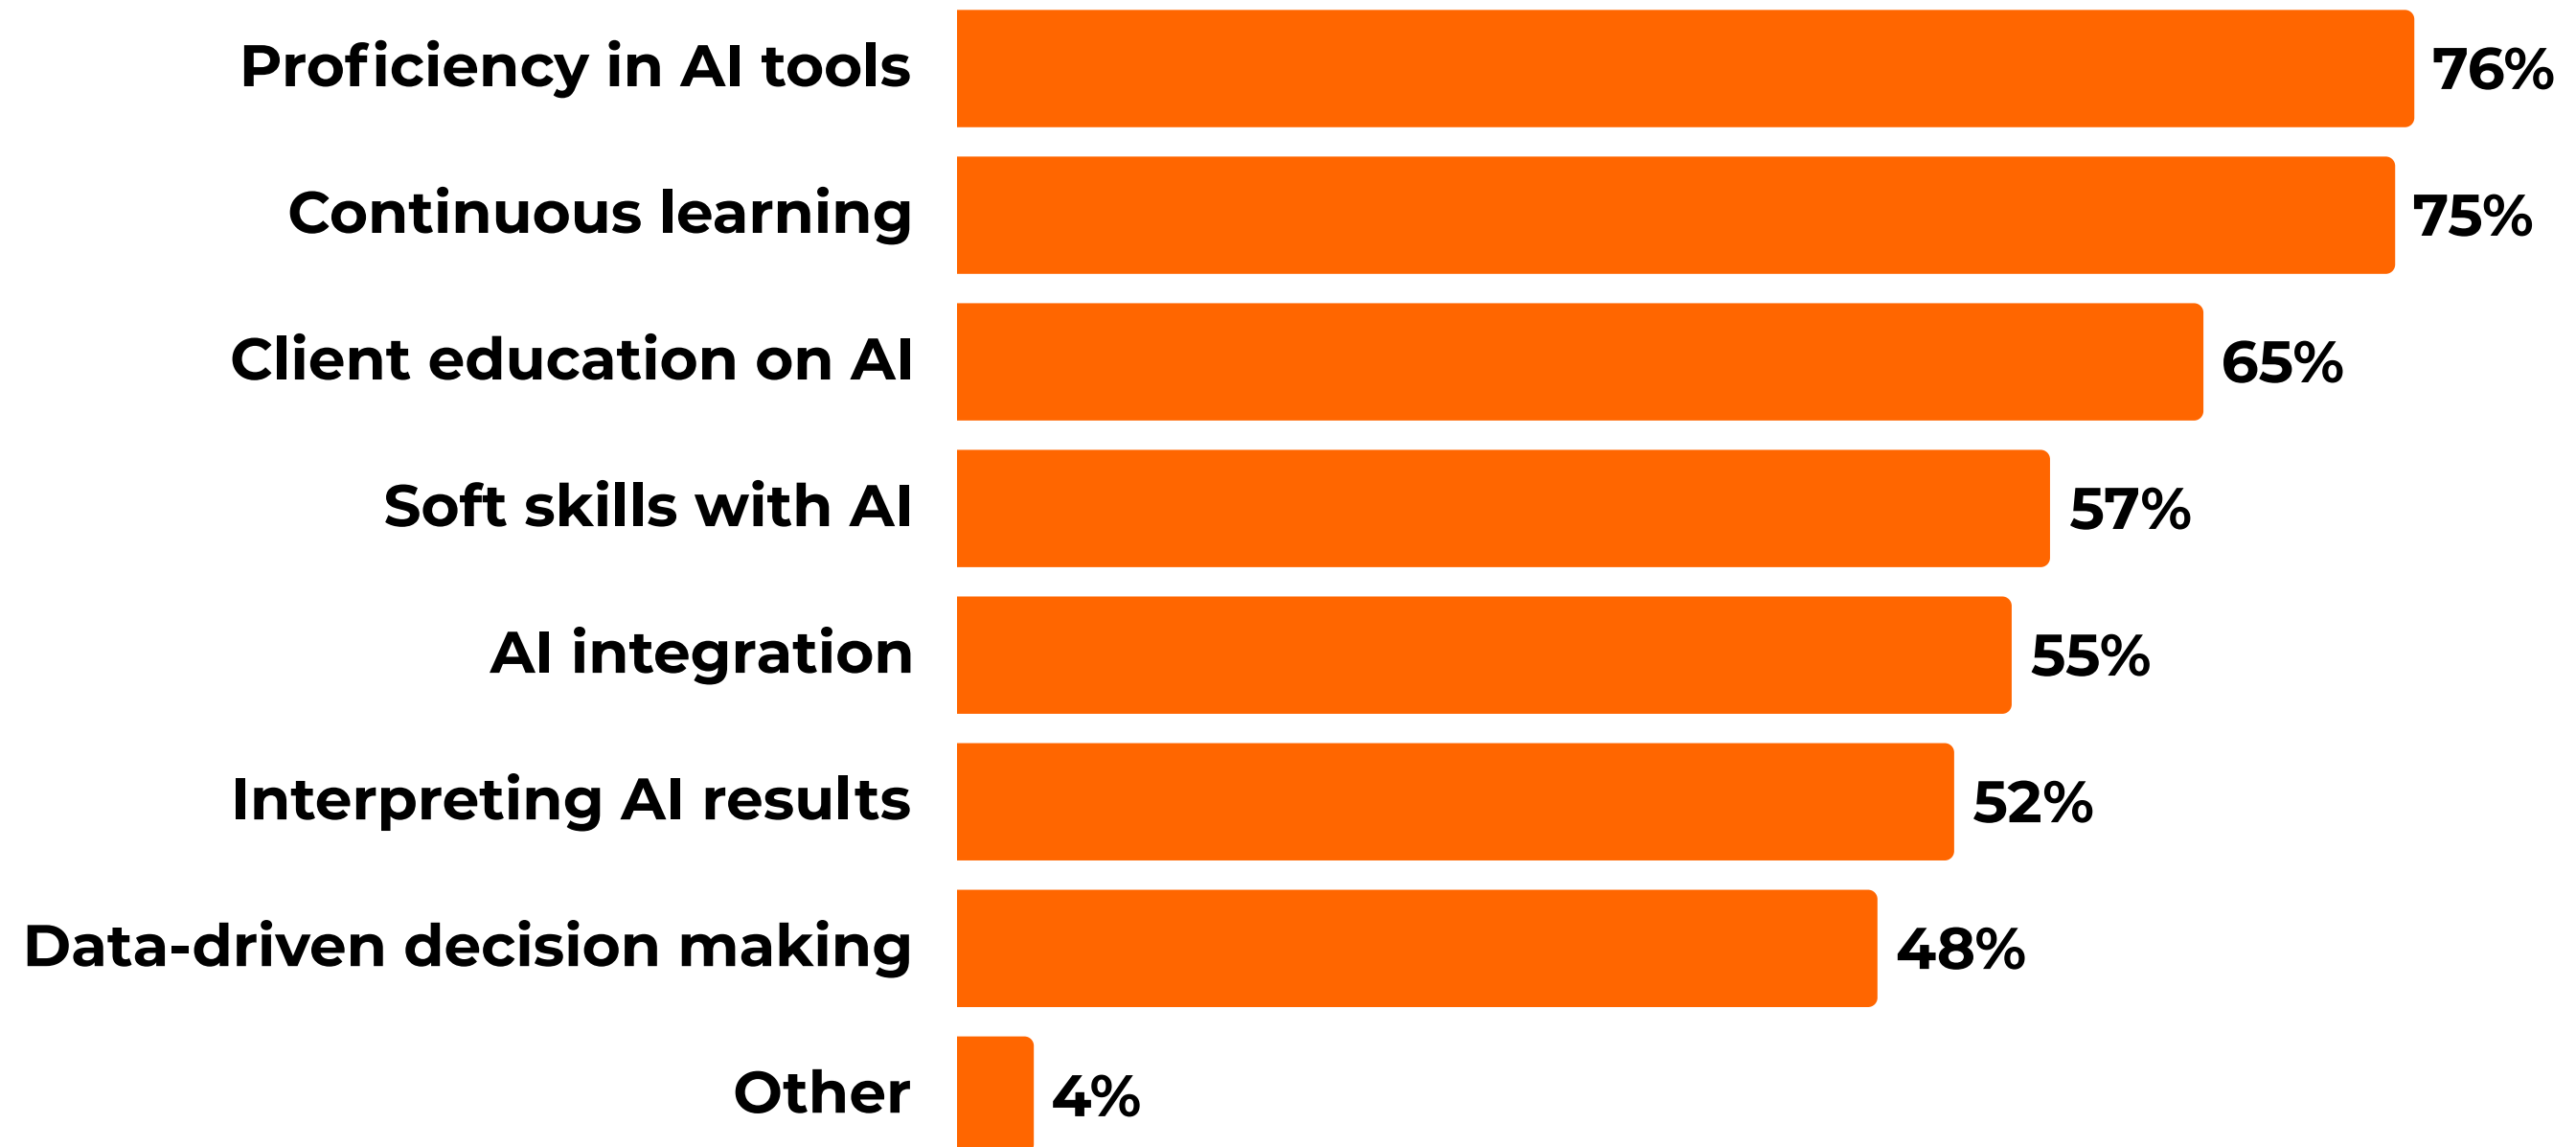

Note: For this question respondents could check all that apply. In these instances, percentages do not add up to 100%.

AI-Related Skills Believed to be Essential

n=862

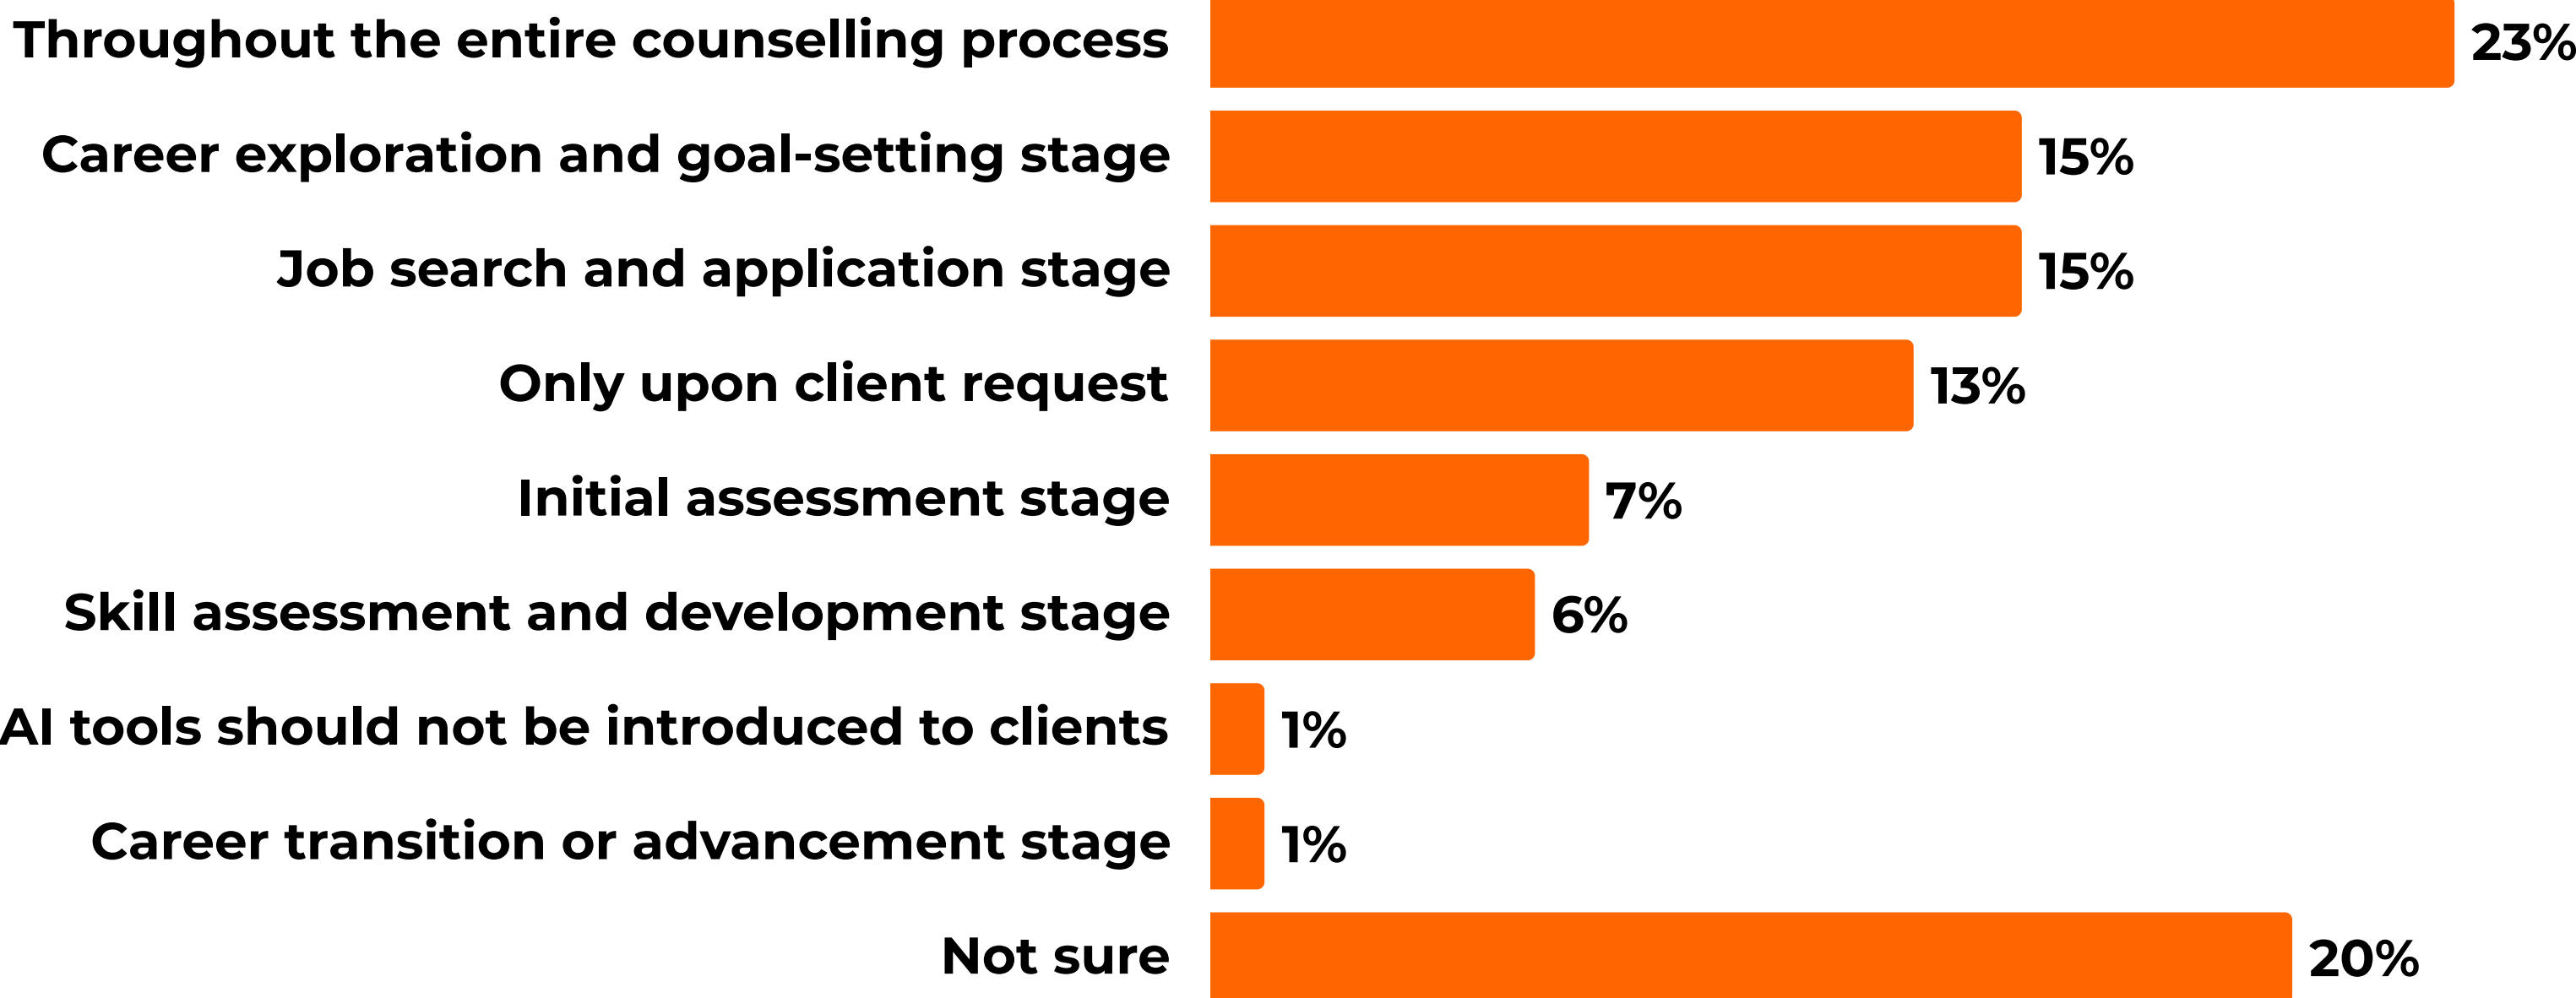

Note: For this question respondents could check all that apply. In these instances, percentages do not add up to 100%.

Stage AI Tools Should be Introduced to Clients

n=862

Section 3: Career Journey

Five-year Career Outlook

n=861

2019

Popular other responses: Unsure (1%), semi-retired/self-employed (1%) and teaching or training roles (1%).

Reasons Considering Switching Fields
